**User-computer Interface Design, Prototyping, and Evaluation** Stephen J. Andriole,Leonard Adelman,2023-05-31 This volume seeks to answer the question Can findings from cognitive science enhance the user computer interaction process In so doing it recognizes that user computer interfaces UCIs are often essential parts of an information or decision support system and often critical components of software intensive systems of all kinds From the outset the authors note that the design prototyping and evaluation of user computer interfaces are part of larger systems and are therefore ideally designed developed and evaluated as part of a larger design and developmental process or life cycle Thus this book describes the process by which functional nonfunctional or display oriented requirements are converted first into prototypes and then into working systems While the process may at times seem almost mysterious there is in fact a methodology that drives the process a methodology that is defined in terms of an adaptive life cycle There are a number of steps or phases that comprise the standard life cycle as well as methods tools and techniques that permit each step to be taken Describing the effort to implement this process to enhance user computer interaction this book presents a methodological approach that seeks to identify and apply findings from cognitive science to the design prototyping and evaluation of user computer interfaces
