Pathways To Literacy Process Transactions:

Pathways to Literacy Michael R. Sampson, Mary Beth Sampson, Roach Van Allen, 1995 **Learning Paths** Jim Williams, Steve Rosenbaum, 2004-09-07 Learning Paths is a down to earth practical resource that is filled with illustrative examples methods techniques strategies processes and tools for making company wide real time training possible Created to be flexible the Learning Path approach can be customized to fit your organization no matter what its type or size Learning Paths is divided into three sections The Learning Path Methodology Walks the reader through the major steps and strategies needed for building Learning Paths Doing the Right Training Offers a wide range of strategies methods and techniques that can be targeted to the training within a Learning Path and tied to an organization's particular business needs Do the Training Right Shows how to ensure the training within a Learning Path is delivered in the most cost effective manner and introduces methods for structuring training so that it transfers to the job easily and effectively **Learning Disabilities** Pol Ghesquière, A. J. J. M. Ruijsenaars, 2005 Research on learning disabilities has known a tremendous growth the last 25 years Yet despite the progress that is made in diverse domains learning disabilities still stay a serious challenge to teaching and instruction In this book the authors try to link original research findings on learning disabilities with instructional methods and teaching practices The first part of the book brings together contributions about the cognitive metacognitive and socio emotional correlates of learning disabilities These factors generally form a core aspect of the challenge of learning disabilities to teaching and instruction The first three chapters concern the phenomenon of dyslexia Van den Broeck critically evaluates the disputable role of intelligence in the concept and definition of dyslexia Hutchinson Whiteley and Smith explore the role of cognitive linguistic skills in the early identification of reading problems in emergent bilingual children Van Ingelghem and colleagues study auditory temporal processing in children with dyslexia In chapter 4 Desoete and Roeyers summarize their research on metacognition in children with mathematics learning disabilities Finally Gadeyne Ghesquière and Onghena explore the relationship between academic achievement and behaviour problems The second part of this book goes deeper into research on intervention and instruction methods The first three chapters focus on reading problems Whitely and her colleagues try to analyze why some children do not benefit from early phonologically based interventions leading to implications for the development of early screening tools and intervention schemes for these non beneficiaries Van Kraenoord Rohl and Rivalland report findings of an Australian study examining the programs and strategies used to teach and intervene in Australian classrooms for students with learning problems Bouwer and Jordaan argue for the use of imaging as a learning support technique for children with dyslexia The last two chapters explore the differential effect of direct and guided instruction for children with arithmetic learning problems Kroesbergen and Van Luit focus on the acquisition and use of multiplication strategies Milo and Ruijsenaars do the same for addition and subtraction up to 100 After reading this book not all challenges of learning disabilities to teaching and instruction will be tackled But it surely can offer some contribution

in getting away from some of them The authors hope it gives a lot of inspiration to the diverse audience we had in mind practitioners as well as researchers of different disciplines
