Electrical, Information Engineering and Mechatronics 2011 Shaobo Zhong,Fuzhong Wang,2012-03-21 As future generation electrical information engineering and mechatronics become specialized and fragmented it is easy to lose sight of the fact that many topics in these areas have common threads and because of this advances in one discipline may be transmitted to others The 2011 International Conference on Electrical Information Engineering and Mechatronics EIEM 2011 is the first conference that attempts to follow the above idea of hybridization in electrical information engineering mechatronics and applications This Proceedings of the 2011 International Conference on Electrical Information Engineering and Mechatronics provides a forum for engineers and scientists to address the most innovative research and development including technical challenges and social legal political and economic issues and to present and discuss their ideas results works in progress and experience on all aspects of electrical information engineering mechatronics and applications Engineers and scientists in academia industry and government will find a insights into the solutions that combine ideas from multiple disciplines in order to achieve something more significant than the sum of the individual parts in all aspects of electrical information engineering mechatronics and applications *Component-Based Software Engineering* Grace A. Lewis,Iman Poernomo,Christine Hofmeister,2009-06-09 The 2009 Symposium on Component Based Software Engineering CBSE 2009 was the 12th in a series of successful events that have grown into the main forum for industrial and academic experts to discuss component technology Component based software engineering CBSE has emerged as the under ing technology for the assembly of exible software systems In essence CBSE is about composing computational building blocks to construct larger building blocks that ful ll client needs Most software engineers are involved in some form of component based development Nonetheless the implications of CBSE adoption are wide reaching and its challenges grow in tandem with its uptake continuing to inspire our scienti c speculation Component based development necessarily involves elements of

software architecture modular software design software verification testing configuration and deployment This year's submissions represent a cross section of CBSE search that touches upon all these aspects The theoretical foundations of component specification composition analysis and verification continue to pose research challenges What exactly constitutes an adequate semantics for communication and composition so that bigger things can be built from smaller things How can formal approaches facilitate predictable assembly through better analysis We have grouped the proceedings into two sub themes that deal with these issues component models and communication and composition At the same time the world is changing
