Teacher's Game Anna Mikura, 2017-04-26 At Thompson University there's a secret game professors are playing. The name of the game is Teacher's Pet. The mechanics: 1. Pick a student. Choose wisely. 2. Have sex with the student in select locations across campus. 3. Whoever clears all areas first wins the pooled cash prize. The most important rule of all: Don't ever get caught. This term Math professor Rowen Henderson has set his eyes on Hayleigh Sullivan, the new student in his class. Determined to win the game this year, he'll do anything to make Hayleigh fall right into his trap, even if it means pretending to fall in love with her. But when the stakes get too high, what happens when Rowen gets caught in a snare of his own design?

Spy Games Gina Robinson, 2009-12-01 Combining the wit of Janet Evanovich and the intrigue of Cherry Adair, Gina Robinson introduces a sizzling couple who find themselves Sleepless in Seattle. Reilly Peterson's been many things in her thirty-two years: an athlete, a model, a sportswear executive. Her ex-boyfriend, however, has done a good job of making Reilly something she's never been scared of. Now Reilly's ready to protect herself with more than her sharp tongue. Fantasy Spy Camp's Seattle-based Urban Ops division will train her to survive using everything from her bare hands to a submachine gun. But when she gets an eyeful of fellow camper Van Keller, all Reilly wants is to chill out, partner up, and go deep undercover. Praise for Spy Candy: Sassy and delightfully entertaining. Beverly Barton, New York Times bestselling author. With the perfect amount of suspense and humor, this story will stay with readers long after the book is over. Romantic Times: Fast, snappy, and cute. Susan Andersen, New York Times bestselling author. *Affective Learning Together* Michael Baker, Jerry Andriessen, Sanna Järvelä, 2013 In the twenty-first century, being able to collaborate effectively is important at all ages in everyday life, education, and work within and across diverse cultural settings. People are increasingly linked by networks that are not only means for working and learning together but are also ways of maintaining social and emotional support. Collaborating with others requires not only elaborating new ideas together but also being able to manage interpersonal relations. In order to design and facilitate effective collaborative situations, the challenge is therefore to understand the interrelations between social, affective, and cognitive dimensions of interactions in groups. *Affective Learning Together* contains in-depth theoretical reviews and case studies of group learning in a variety of educational situations and taught disciplines, from small groups working in the secondary school classroom to teams of medical students and more informal working groups at university level. Contributors provide detailed analyses of the dynamics of interpersonal relations and affects in relation with processes of meaning and knowledge elaboration, including discussion of the variety of social learning situations and experiences, social identities in group learning, emotion, motivation, and knowledge elaboration, conflict, arguments, and interpersonal tensions in group learning. Bringing together a broad range of contributions from internationally recognised researchers who are seeking to broaden, deepen, and integrate the field of research on collaborative learning, this book is essential reading for all serious students of contemporary educational research and practice.
