ARTIFICIAL INTELLIGENCE AND CONTEMPORARY MEDIA Dr. Moon Jana, Dr. Shourini Banerjee, 2025-06-13 Artificial Intelligence plays a pivotal role in transitioning from generic uniform content to personalised experiences tailored for individualistic approach Utilising sophisticated algorithms AI platforms analyse user sentiments behaviours and engagement patterns to curate tailored content news feed videos articles and advertisements This book aims at understanding different viewpoints from authors on Artificial Intelligence technology and the contemporary media scenario **Superintelligence is Coming - The Future of AI Has Already Begun** Rashmi Shah, Superintelligence is Coming The Future of AI Has Already Begun delves into the profound implications of artificial intelligence transitioning from science fiction to an undeniable reality This book is an essential exploration for anyone grappling with the rapid advancements in AI providing a detailed and accessible look at a phenomenon that promises to redefine our understanding of reality intelligence power and control As highlighted by QuickTechie com this isn't merely about technology it's about the existential shift occurring as machines begin to not only mimic but surpass human capabilities in thought strategy and autonomy The book begins by grounding the reader in the historical progression of AI tracing its evolution from early concepts like Turing machines and expert systems to the sophisticated large language models LLMs deep neural networks and reinforcement learning agents of today It meticulously illustrates how a technology once limited to playing checkers now influences diplomacy warfare education and personal relationships QuickTechie com emphasizes that understanding this trajectory is crucial to comprehending the impending era of superintelligence A central theme is the core concept of superintelligence itself what it means how it distinguishes itself from narrow AI or artificial general intelligence AGI and the intrinsic traits of such systems unparalleled speed accuracy memory self learning and the ability to model and manipulate outcomes far beyond human comprehension The book then illuminates the intense global race to achieve superintelligence spearheaded by tech giants like OpenAI DeepMind Anthropic Meta and leading Chinese research labs This race as underscored by QuickTechie com is not just for innovation but for control over the very future of intelligence A significant portion of the book is dedicated to the critical question of control exploring the control problem where even well intentioned goals can lead to unpredictable consequences when interpreted by machines devoid of empathy or human context It delves into classic thought experiments like the paperclip maximizer and the complexities of value alignment alongside a deep ethical discussion on whose values will shape AI and whether machines can ever truly grasp concepts like fairness justice or freedom This moral and philosophical core as noted by QuickTechie com is paramount for a responsible approach to AI development Moving beyond theory the book examines the tangible impact of superintelligent and near superintelligent systems on daily life from reshaping jobs creativity and education to altering personal relationships It addresses how AI is already composing music designing diagnosing and even replacing entry level roles prompting vital questions about the future of human work and purpose Most importantly it confronts the existential

risks associated with superintelligence posing whether it could be humanity's ultimate invention or its greatest peril. The concluding chapter outlines the urgent choices humanity faces: advocating for regulation, public awareness, global cooperation, and individual responsibility to steer AI towards a beneficial future. *Superintelligence is Coming* is not a textbook nor a doomsday prophecy but a balanced, intelligent, and urgent conversation about a force already shaping our world. QuickTechie.com recommends this book for anyone: students, tech enthusiasts, policymakers, or the simply curious seeking a clear understanding of the AI spectrum, real-world examples of AI outperformance, ethical frameworks, and an awareness of both the existential risks and transformative potential of superintelligence, empowering readers with a sense of agency in an increasingly automated world.

Surviving the Wild Wild Web Marton Gergely, Ian Grey, Heba Saleous, 2024-12-26. The information security arena is often vague and confusing for internet users, both young and old. New traps are being devised daily, and falling into them can take legal, ethical, financial, physical, and mental tolls on individuals. With increasing cases of fake news, identity theft, piracy, spying, and scams surfacing, this book explains the risks of the internet and how they can be mitigated from a personal and professional perspective. *Surviving the Wild Wild Web: A User's Playbook to Navigating the Internet's Trickiest Terrains* is a readable guide addressing the malicious behaviors within internet cultures. Written in simple and jargon-free language, the book describes ten pillars of information security risks faced by all internet users. Each pillar will be detailed as a story starting with the roots of the problem and branching out into tangential related issues and topics. Each chapter ends by detailing ways a user can avoid falling victim to cyber threats. It uses a combination of news articles, topical current events, and previously published academic research to underpin the ideas and navigates how users interact with the World Wide Web. The book aims to create a generation of internet-literate readers who can spot the pitfalls of the internet in their personal and professional lives to surf the web safely. This guide will appeal to any individual interested in internet safety, with a potential readership extending to students and professionals in the fields of computer science, information systems, cybersecurity, business management, human resources, psychology, medicine, education, law, and policy.

CINEMA INDUSTRY AND ARTIFICIAL INTELLIGENCE DREAMS prof. IBRAHIM ELNOSHOKATY, The learning Machine can write like Shakespeare, yes it can do that, but how can it do the same wording, the same style, but create an emotional story or play, can it, or humans can like that, or any passed-away writer can. The scientists create text-to-text, deep learning, machine learning from all of his production style, wording, pattern, plot, form, and his own character. It's easy to do that, right now it is the Eternity to be or not to be, that is the problem.

Best Of Soviet Semiconductor Physics And Technology (1989-1990) Michael S Shur, Michael E Levinshtein, 1995-12-08

Each year a large number of first rate articles on the physics and technology of semiconductor devices written by Soviet experts in the field are published However due to the lack of exchange and personal contact most of these unfortunately are neglected by many scientists from the United States Japan as well as Western Europe Consequently many important developments in semiconductor physics are missed by the Western world This book is a serious attempt to bridge the gap between the Soviet and Western scientific communities Most of all it is an effort towards facilitating the communication and sharing of knowledge amongst people from different parts of the world Ultimately the aim is to contribute towards the building of a better world for all one where the knowledge of advanced technology and scientific discoveries is used to improve the quality of life and not the pursuit of selfish mutually destructive behavior For those in the field who wish to partake in this exchange of knowledge and as a gesture of support for their Soviet counterparts the reading of this book provides the first step
