Can Our Civilisation Survive the Changes Generated by New Technology? Analysing Society and Media Vesna Lukovic, Marja Novak Vogric, 2024-07-09 Human history is a history of powerful civilisations which collapsed for various reasons but behind all of those reasons there was the inability of each civilisation to adapt to changes that were introduced by the human race itself or by the external environment Judging from history we can expect that our civilisation might collapse as well This book takes a look at the huge changes brought by new technology that was introduced by humans over the past few decades and might have the power to destroy the modern civilisation It analyses social disadvantages of the new technology and attempts to answer the question of what has to be done to enable society to adapt to the new technology embrace it and use it for the collective good It also explains how to recognize fake news why Orson Welles was a fake news visionary and why Monica Lewinsky was one of the first victims of the modern new technology

Industrial Organization in Iran Yoko Iwasaki, 2017-07-11 This book focuses on Iran to explore the question of how the nature of industrial organizations and the whole system they constitute can exert a great influence on an industry's competitiveness and resilience The author examines what happens if firms and companies participating in the manufacturing and distribution process of a certain product are not organized to a high degree and operate independently The book begins with an inquiry into the historical environment of Iran's apparel industry which has never been stable It then reveals the specific practices that enable firms to maintain their independent business and argues that the elastic state of the production and distribution system has worked for the survival of self-reliant member firms The typical Iranian apparel firm persists in maintaining independent operations regardless of its size a practice that is inimical to the development of long-lasting business relations with other firms as well as to vertical integration between firms in all stages from production to distribution A distinguishing feature of Iran's apparel industry is that the member firms are barely

organized compared with their counterparts in advanced industrialized countries Despite such a weakly organized system generally small scale but self reliant Iranian firms courageously persist in the face of the market s difficulties Superficially it appears that Iran s apparel market is being filled with Chinese goods but the reality is somewhat different Apparel firms that are currently doing business with China but are ready to terminate it at any time are taking advantage of newly emerging opportunities to ensure the survival of their own businesses Reopening those businesses for domestic operations remains an ever present possibility for them *Reptiles* ,1996
