Progression And Regression In Language Sociocultural Neuropsychological And Linguistic Perspectives:
Progression and Regression in Language Kenneth Hyltenstam,Ake Viberg,1993 First published in 1994 this crosslinguistic collection looks at changes and developments in language involving gain or loss in structural complexity or utility The dynamics of these processes of progression and regression are examined at the societal and the individual level and the two are compared In the former the focus is on the social and cultural forces that influence groups of speakers to create new languages or abandon old ones In the latter the acquisition and attrition of both first and second languages are considered Questions raised include Can parallel structural patterning be observed in whole languages and in the individual s version of a language Is there parallelism between progression and regression Can changes occurring in progression and regression be interpreted in a typological framework These are addressed from sociological neuropsychological and linguistic perspectives **A Dynamic Model of Multilingualism** Philip Herdina,Ulrike Jessner,2002 The model presented in this volume draws together various strands of research second language acquisition theory bilingualism research dynamic systems theory to develop a novel approach to this challenging subject Its main focus lies on the psycholinguistic dynamics of multilingualism the processes of change in time affecting two or more language systems **Corpus Linguistics and Linguistic Theory** Christian Mair,Marianne Hundt,2000 From being the occupation of a marginal and frequently marginalised group of researchers the linguistic analysis of machine readable language corpora has moved to the mainstream of research on the English language In this process an impressive body of results has accumulated which over and above the intrinsic descriptive interest it holds for students of the English language forces a major and systematic re thinking of foundational issues in linguistic theory Corpus linguistics and linguistic theory was accordingly chosen as the motto for the twentieth annual gathering of ICAME the International Computer Archive of Modern Medieval English which was hosted by the University of Freiburg Germany in 1999 The present volume which presents selected papers from this conference thus builds on previous successful work in the computer aided description of English and at the same time represents an attempt at stock taking and methodological reflection in a linguistic subdiscipline that has clearly come of age Contributions cover all levels of linguistic description from phonology prosody through grammar and semantics to discourse analytical issues such as genre or gender specific linguistic usage They are united by a desire to further the dialogue between the corpus linguistic community and researchers working in other traditions Thereby the atmosphere ranges from undisguised skepticism as expressed by Noam Chomsky in an interview which is part of the opening contribution by Bas Aarts to empirically substantiated optimism as for example in Bernadette Vine s significantly titled contribution Getting things done *Chicano English in Context* C. variety and explores its crucial role in the construction of ethnic identity among young Latinos and Latinas It also corrects misconceptions in how the general public views Chicano English **An Introduction to Bilingualism** Jeanette Altarriba,Roberto R.
