Promoting Quality In Learning Does England Have The Answer:

Promoting Quality in Learning Patricia Broadfoot, Marilyn Osborn, Claire Planel, 2000-02-01 Are English children able to grasp grammar better or worse than that of children in other countries Are they better or worse at numeracy than their neighbours Does the English education system measure up to the challenge from its competitors This is an examination of the education system in England as compared with neighbouring countries such as France This text shows what pupils in England and France are doing in the classroom and what standards they achieve The voices of the pupils themselves articulate numerous perceptions Revisiting Insider-Outsider Research in Comparative and International Education

Michael Crossley, Lore Arthur, Elizabeth McNess, 2015-11-01 This volume recognises how many researchers across the social sciences and in comparative and international education in particular see themselves as insiders or outsiders or more pertinently shifting combinations of both in the research process The book revisits and problematises these concepts in an era where the global mobility of researchers and ideas has increased dramatically and when advances in comparative qualitative research methodologies seek to be more inclusive collaborative participatory reflexive and nuanced Collectively the chapters argue that in the context of such change it has become more difficult to categorise and label groups and individuals as being inside or outside systems professional communities or research environments In doing so it is recognised that individual and group identities can be multiple flexible and changing such that the boundary between the inside and the outside is permeable less stable and less easy to draw The book draws upon an exciting collection of original research carried out in a diversity of educational systems from British European Latin American Indian Ocean South Asian African and Chinese contexts and cultures This develops a deep and innovative reconsideration of key issues that must be faced by all researchers involved in the planning and conduct of in depth field research This is a challenging and stimulating methodological contribution designed to advance critical and reflective thinking while providing practical and accessible guidance insights and support for new and experienced researchers within and beyond the field of comparative and international education *Transforming education policy* Philip A. Woods, 2011-07-06 Education is in a state of continual change and schools ever more diverse People want more participation and meaning in their lives organisations want more creativity and flexibility Building on these trends this timely book argues that a new paradigm is emerging in education sowing the seeds of a self organising system that values holistic democracy It is an essential read for anyone academics policy makers practitioners students parents school sponsors and partners who is interested in how education can broaden its horizons

International Handbook of Comparative Education Robert Cowen, Andreas M. Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all

authors who did deliver which was almost everyone we asked We know that some of our authors worked in very difficult private circumstances as they were finishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of difficulties and disasters overcome The only sad theme is that some very close colleagues with whom we were working and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook
