Proportion Philosophy Science And Architecture:

Proportion Richard Padovan, 1999 This handbook provides readers with a well illustrated and readable comparative guide to proportion systems in architecture setting out the mathematical principles that underlie the main systems and illustrating these with examples of their use in historical and modern buildings The main body of the text traces the interplay of abstraction and empathy through the history of science philosophy and architecture from the early Greeks through to the two early twentieth century architects who made proportion the focus of their work Le Corbusier and Van der Laan The book ends with a reflection on the present and future role of proportion in architecture Philosophy of Technology and Engineering Sciences, 2009-11-27

The Handbook Philosophy of Technology and Engineering Sciences addresses numerous issues in the emerging field of the philosophy of those sciences that are involved in the technological process of designing developing and making of new technical artifacts and systems These issues include the nature of design of technological knowledge and of technical artifacts as well as the toolbox of engineers Most of these have thus far not been analyzed in general philosophy of science which has traditionally but inadequately regarded technology as mere applied science and focused on physics biology mathematics and the social sciences First comprehensive philosophical handbook on technology and the engineering sciences Unparalleled in scope including explorative articles In depth discussion of technical artifacts and their ontology Provides extensive analysis of the nature of engineering design Focuses in detail on the role of models in technology **Proportion** Richard Padovan, 1999 Modernity, Frontiers and Revolutions Maria do Rosário

Monteiro, Mário S. Ming Kong, Maria João Pereira Neto, 2018-09-25 The texts presented in Proportion Harmonies and Identities PHI MODERNITY FRONTIERS AND REVOLUTIONS were compiled with the intent to establish a multidisciplinary platform for the presentation interaction and dissemination of research It also aims to foster awareness of and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture Arts and Humanities Design Engineering Social and Natural Sciences and their importance and benefits for the sense of both individual and community identity The idea of modernity has been a significant driver of development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts **Architectural Principles in the Age of Cybernetics** Christopher Hight, 2007-12-12 A theoretical history of anthropomorphism and proportion in modern architecture this volume brings into focus the discourse around proportion with current problems of post humanism in architecture alongside the new possibilities made available through digital technologies The book examines how the body and its ordering has served as a central site of architectural discourse in recent decades especially in attempts to reformulate architecture s relationship to humanism modernism and technology Challenging some concepts and categories of architectural history and situates current debates within a broader cultural and technological context Hight makes complex

ideas easily accessible Extensively illustrated and written without academic jargon for an informed but non specialized architectural audience this book elucidates the often obscure debates of avant garde architectural discourse and design while demonstrating how these debates have affected everyday places and concepts of architecture As a result it will appeal to professional architects academics and students combining as it does an insightful introduction to the fundamental issues of architectural history and theory over the past fifty years with entirely new formulations of what that history is and means

Creation, Transformation and Metamorphosis Mário S. Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2025-07-29 The texts presented in Proportion Harmonies and Identities PHI Creation Transformation and Metamorphosis were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research It also aims to foster awareness and discussion on Creation Transformation and Metamorphosis focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal Creation Transformation and Metamorphosis has been a powerful motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists seeking strategies and policies to accelerate development in different contexts The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

With(Out) Trace: Interdisciplinary Investigations into Time, Space and the Body Simon Dwyer, Rachel Franks, Reina Green, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2015 This book With out Trace Inter Disciplinary Investigations into Time Space and the Body unpacks many of the issues that surround the idea of trace what we intentionally and unintentionally leave behind as well as how trace can help us to move forward In particular this volume looks at how an inter disciplinary approach can suggest new ways of seeing and subsequently exploring interconnections between time space and the body The papers within this work accomplish more than tracing a theme a theory or discipline within the study of time space and the body Moreover the collection does not simply trace past debates about the relationship between the three Indeed the interdisciplinarity of this collection will it is hoped suggest other ways of seeing the field and of tracing new paths through it Exploring those new perspectives and new paths will undoubtedly enrich future thinking about the interconnections between time space and the body
