These spaces may include the home, the workplace, science centers, libraries, that is, contexts that entail diverse social, physical, psychological and pedagogical variables that facilitate learning, for example, by grouping desks in specific ways, utilizing audio, visual and digital technologies. Scientific Approaches to Literature in Learning Environments puts together a series of empirical research studies on the different locations of teaching and learning. These studies represent literary learning environments throughout the world, including Brazil, the USA, China, Canada, Japan and several European countries such as the Netherlands, Ukraine, the UK and Malta. The studies reported describe quantitative and/or qualitative research and cover pre-primary, primary, high school, college, university and lifelong learning environments. They refresh the enigmatic ambience that often surrounds the teaching and learning that goes on in literary studies and offer transparent, useful and replicable research and practice.
