

education', came to life again in America, with the battle between academic and beat diction (Wilson, 176-178).

Let me conclude by quoting a few of the various interpretations of the volume's key concept, *purism*. Neustupný (211) perceives purism as "one of many corrective processes directed toward culture." For Henningsen (31-32), "the politics of purity . . . originates in the quest for identity and authenticity of a cultural Self that feels threatened by the hegemonic pressure of another culture." Jernudd (5) sees in purism "an articulation of changes in relations between Self and Others in the medium of language." And "the Other [as Shapiro (28) perceives the concept] is located most fundamentally in language."

DENNIS R. PRESTON, *Perceptual dialectology: Nonlinguists' views of areal linguistics* (Topics in Sociolinguistics, 7). Dordrecht, Holland, and Providence, RI: Foris, 1989. Pp. xviii + 142.

Since the early 1980s, Dennis Preston has been inventing a field he calls *perceptual dialectology* – "a small part of the [larger] search for an anthropologically sound folk linguistics" (xi; see also Hoenigswald 1966). He wants to study "nonlinguists' views of areal linguistics" in modern industrialized nations, seeking to find out how members of "the nonlinguistic community characterize linguistic facts" pertaining to dialect (xi). Thus far, the project has been carried out only in the United States and Brazil (but see also the work in Japan and England of Inoue and Britain [1990]), and the wrinkles have by no means been ironed out yet (at least not in this book, a collection of essays written 1981-1988) – though they seem to be on their way toward being ironed out.

Preston himself raises the basic issue of why linguists would want to know what nonlinguists think about dialects. There are several answers. Though Preston does not say so, his work connects with such other studies of contemporary American folk attitudes toward linguistic behavior as the work of Conley and O'Barr (1990) on courtroom linguistic attitudes of various kinds. Also, "the study of the caricatures and stereotypes speakers have of their linguistic surroundings may, eventually" help to explain the mechanisms of linguistic change (xi). Furthermore, such "studies provide an additional perspective on so-called language attitudes" as studied by social psychologists, and they should shed light on "such abstract constructs as SPEECH COMMUNITY" (xii). This book deals with various indigenous traditions of grammatical thought across the globe. Its main perspective is a cross cultural sociolinguistic and anthropological linguistic account of Indigenous Grammar. The concept relating to Bruno Liebich's term *Einheimische Grammatik* is taken in its widest sense here to account for a continua of forms and ways of language oriented research, various degrees of systematic reflection on language structure and use, the culture specific ingredients of different grammatical schools, linguistic and folk linguistic speculation, language awareness, linguistic ideologies and similar endeavours. Some assumptions underlying the central hypotheses of this book are: Linguistics every grammatical description has a strong cultural binding. It is worthwhile to describe the culturally bound differences in a systematic fashion. There are indigenous grammars and grammarians of entirely different denominations than what Western linguists are accustomed to dealing with. A heuristic continua of indigenous grammar can be set up which is worth being studied by linguists in a cross cultural comparative fashion.
