Performing Music Shared Concerns:

Performing Music Jonathan Dunsby, 1995 It is written in non technical language in order that the lay reader may easily gain an insight into how performers think and what they think about It is performers who bring classical music to a worldwide public and yet the public is largely unaware of what it feels like to perform music what aspects of the activity are a mystery even to the musicians themselves and which are amenable to scrutiny experiment and improvement **Musical**

The Musical Work of Nadia Boulanger Jeanice Brooks, 2013-04-25 Nadia Boulanger composer critic impresario and the most famous composition teacher of the twentieth century was also a performer of international repute Her concerts and recordings with her vocal ensemble introduced audiences on both sides of the Atlantic to unfamiliar historical works and new compositions This book considers how gender shaped the possibilities that marked Boulanger's performing career tracing her meteoric rise as a conductor in the 1930s to origins in the classroom and the salon Brooks investigates Boulanger's promotion of structurally motivated performance styles showing how her ideas on performance of historical repertory and new music relate to her teaching of music analysis and music history The book explores the way in which Boulanger's musical practice relied upon her understanding of the historically transcendent masterwork in which musical form and meaning are ideally joined and shows how her ideas relate to broader currents in French aesthetics and culture **Absolute**

Musical, Mechanical Reproduction Arved Ashby, 2010-06-07 Recordings are now the primary way we hear classical music especially the more abstract styles of absolute instrumental music In this original provocative book Arved Ashby argues that recording technology has transformed our understanding of art music Contesting the laments of nostalgic critics Ashby sees recordings as socially progressive and instruments of a musical vernacular but also finds that recording and absolute music actually involve similar notions of removing sound from context He takes stock of technology's impact on classical music addressing the questions at the heart of the issue This erudite yet concise study reveals how mechanical reproduction has transformed classical musical culture and the very act of listening breaking down aesthetic and generational barriers and mixing classical music into the soundtrack of everyday life *Musicians in the Making* John Scott Rink, Helena Gaunt, Aaron

Williamon, 2017 Musicians are continually in the making tapping into their own creative resources while deriving inspiration from teachers friends family members and listeners Amateur and professional performers alike tend not to follow fixed routes in developing a creative voice instead their artistic journeys are personal often without foreseeable goals The imperative to assess and reassess one's musical knowledge understanding and aspirations is nevertheless a central feature of life as a performer Musicians in the Making explores the creative development of musicians in both formal and informal learning contexts It promotes a novel view of creativity emphasizing its location within creative processes rather than understanding it as an innate quality It argues that such processes may be learned and refined and furthermore that collaboration and interaction within group contexts carry significant potential to inform and catalyze creative experiences and outcomes The book also traces and models the ways in which creative processes evolve over time Performers music teachers and researchers will find the rich body of material assembled here engaging and enlightening The book's three parts focus in turn on Creative learning in context Creative processes and Creative dialogue and reflection In addition to sixteen extended chapters written by leading experts in the field the volume includes ten Insights by internationally prominent performers performance teachers and others Practical aids include abstracts and lists of keywords at the start of each chapter which provide useful overviews and guidance on content Topics addressed by individual authors include intrapersonal and interpersonal dynamics performance experience practice and rehearsal self regulated performing improvisation self reflection expression interactions between performers and audiences assessment and the role of academic study in performers development

Investigating Musical Performance Gianmario Borio, Giovanni Giuriati, Alessandro Cecchi, Marco Lutz, 2020-05-21 Investigating Musical Performance considers the wide range of perspectives on musical performance made tangible by the cross disciplinary studies of the last decades and encourages a comparison and revision of theoretical and analytical paradigms The chapters present different approaches to this multi layered phenomenon including the results of significant research projects The complex nature of musical performance is revealed within each section which either suggests aspects of dialogue and contiguity or discusses divergences between theoretical models and perspectives Part I elaborates on the history current trends and crucial aspects of the study of musical performance Part II is devoted to the development of theoretical models highlighting sharply distinguished positions Part III explores the relationship between sign and sound in score based performances finally the focus of Part IV centres on gesture considered within different traditions of musicmaking Three extra chapters by the editors complement Parts I and III and can be accessed via the online Routledge Music Research Portal The volume shows actual and possible connections between topics problems analytical methods and theories thereby reflecting the wealth of stimuli offered by research on the musical cultures of our times
