**Mathematics in Service to the Community** Charles Robert Hadlock, 2005 Publisher description This book looks at the wide variety of ways in which math statistics and math education teachers have incorporated service learning into their courses These projects are not just stand alone community service initiatives but rather they specifically target the improvement of mathematics skills and insights of the college students in the courses with which they are associated In some cases the projects are the major focus of the courses In others they may range from an essential component to one of several options The book also speculates about heretofore untapped possibilities for service learning even including courses in pure mathematics College faculty often may not fully appreciate the wide range of support mechanisms for such ventures even within their own institutions so the book includes a lengthy chapter on the details of converting a rough idea to a solid action plan sometimes even picking up financial support and other often unexpected benefits along the way Creative teachers rarely implement a project in exactly the same way as a colleague might have so the emphasis here is to display a wide range of successful projects in order to encourage readers to develop some of their own

**MAA Notes** , 1983 **Leading the Mathematical Sciences Department** Tina H. Straley, Marcia P. Sward, Jon W. Scott, 2005 *Innovations in Teaching Statistics* Joan B. Garfield, 2005 This is a book of stories about teaching statistics These stories are told by fourteen different instructors of innovative statistics courses who demonstrate that learning statistics can be a positive meaningful and even exciting experience Despite the prevailing opinion that statistics courses are dull and difficult for students these stories paint quite a different picture In the classes of the instructors whose stories fill this book students are engaged in learning are empowered to do statistics and appreciate the instructional methods of their teachers The instructors profiled in this book are inspiring dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics Each chapter begins by describing how the author became a teacher of statistics then provides details about the courses they currently teach describing their teaching method textbook types of student assessments and uses of technology One typical class is described in detail to provide a snapshot of what each person s teaching looks like The writers then tell the story of the process they went through in developing an innovative course and conclude their chapters with a discussion of their future plans for course revision or development As you read these stories you will learn about some great activities some helpful technological tools and some innovative assessment methods By reading these stories teachers of statistics will understand and be motivated to try different ways to implement reform recommendations so that these recommendations

may continue to lead to a variety of new materials activities and teaching approaches I hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods leave behind more traditional approaches to teaching statistics and carefully examine the effect of their teaching on student learning Publisher Journal New South Wales.
