Library of Congress Catalogs Library of Congress, 1976 *Futures, Visions, and Responsibility* Martin Sand, 2018-06-21 Martin Sand explores the problems of responsibility at the early visionary stages of technological development He discusses the increasingly dominant concept of innovation and outlines how narratives about the future are currently used to facilitate technological change to foster networks and to raise public awareness for innovations This set of activities is under increasing scrutiny as a form of visioning The author discusses intentionality and freedom as important albeit fuzzy preconditions for being responsible He distinguishes being from holding responsible and explores this distinction's effects on the problem of moral luck Finally he develops a virtue ethical framework to discuss visioners and innovators responsibilities
