Restoring Diversity Strategies For Reintroduction Of Endangered Plants:

Restoring Diversity Donald A. Falk, Margaret Olwell, Constance I. Millar, 1996 Topics considered include the strategic and legal context for rare plant restoration the biology of restoration use and misuse of mitigation in rare plant conservation and case studies from across the United States Conservation Biology Peggy L. Fiedler, Peter M. Kareiva, 2012-12-06 Reflecting what a new generation of conservation biologists is doing and thinking this vital and far ranging second edition explores where conservation biology is heading It challenges many conventions of conservation biology by exposing certain weaknesses of widely accepted principles Combining contributions from both the school and the new breed of conservation biologists this insightful text focuses primarily on topics that are integral to the daily activities of conservation biologists Several chapters address ecosystem restoration and biotic invasions as well as the mechanics of population viability analyses which are now a routine facet of conservation efforts A case history approach is implemented throughout the book with the use of practical real world examples Furthermore an in depth look at quantitative analyses is presented allowing for models and mathematical analyses to pinpoint limitations in existing data and guide research toward those aspects of biology that are most likely to be critical to the dynamics of a species or an ecosystem Foundations of Restoration Ecology Donald A. Falk, Margaret A. Palmer, Joy B. Zedler, 2013-03-19 As the practical application of ecological restoration continues to grow there is an increasing need to connect restoration practice to areas of underlying ecological theory Foundations of Restoration Ecology is an important milestone in the field bringing together leading ecologists to bridge the gap between theory and practice by translating elements of ecological theory and current research themes into a scientific framework for the field of restoration ecology Each chapter addresses a particular area of ecological theory covering traditional levels of biological hierarchy such as population genetics demography community ecology as well as topics of central relevance to the challenges of restoration ecology such as species interactions fine scale heterogeneity successional trajectories invasive species ecology ecophysiology Several chapters focus on research tools research design statistical analysis modeling or place restoration ecology research in a larger context large scale ecological phenomena macroecology climate change and paleoecology evolutionary ecology The book makes a compelling case that a stronger connection between ecological theory and the science of restoration ecology will be mutually beneficial for both fields restoration ecology benefits from a stronger grounding in basic theory while ecological theory benefits from the unique opportunities for experimentation in a restoration context Foundations of Restoration Ecology advances the science behind the practice of restoring ecosystems while exploring ways in which restoration ecology can inform basic ecological questions It provides the first comprehensive overview of the theoretical foundations of restoration ecology and is a must have volume for anyone involved in restoration research teaching or practice *Park Science* , 1999 *Restoring Diversity* , In April 1993 a conference of academic biologists agency staff members activists and other experts critically explored the value of ecological restoration as a conservation strategy

Restoring Diversity examines and expands on the issues set forth at that gathering including strategy case studies the biology of restoration and the use of mitigation in rare plant conservation **Restoring Diversity** Donald A. Falk, Constance I. Millar, Margaret Olwell, 1996 The reintroduction of rare and endangered species to their natural habitat is one of emerging tools of ecosystem management Yet despite hundreds of ongoing projects the biological underpinnings of such activity are poorly understood and important questions remain Restoring Diversity provides biological policy and regulatory foundations for successful restoration of rare plants Topics considered include the strategic and legal context for rare plant restoration the biology of restoration use and misuse of mitigation in rare plant conservation and case studies from across the United States Restoring Diversity presents model guidelines for the reintroduction of endangered plants guidelines that incorporate ideas contained in the book's chapters with the wide ranging experience of experts in the field It is a pathbreaking work that not only unifies concepts in the field of restoration but also fills significant technical and policy gaps and provides operational tools for successful restorations **An Action Plan for Conserving Rare Native Plants of the Midwestern United States**, 1999 **Conservation and Management of Native Plants and Fungi** Thomas N. Kaye, 1997 **Australian Journal of Botany**, 2011 *Natural Areas Journal*, 2001 *Plant Conservation in the Tropics* Mike Maunder, 2002 Plant Conservation in the Tropics presents a set of case studies reviewing some of the most pertinent plant conservation being carried out by experts at the tropical biodiversity frontline *Rhodora*, 2006 *Canadian Journal of Botany*, 2007

Biodiversität und Landschaftsnutzung in Mitteleuropa Gotthilf Hempel, 2003 **The Role of Restoration in Ecosystem Management** Society for Ecological Restoration. Conference, 1996 *Two Research Approaches to Ecocultural Restoration in California* Diana Lee Immel, 2007 *Restoration & Management Notes*, 1998 *Ex Situ Plant Conservation* Edward O. Guerrant, Kayri Havens-Young, Mike Maunder, 2004 Ex Situ Plant Conservation outlines the role value and limits of ex situ conservation as well as updating best management practices for the field **Northwest Science**, 1998 *Seed Conservation* Roger D.
