## **Restructuring Korea Inc Financial Crisis Corporate Reform And Institutional Transition:**

**Restructuring 'Korea Inc.'** Jang-Sup Shin, Ha-Joon Chang, 2003-01-16 The 1997 South Korean financial crisis not only shook the country itself but also sent shock waves through the financial world at large This impressive book critically assesses the conventional wisdom surrounding the Korean crisis and the performance of the IMF sponsored reform programme Looking first at the strengths and weaknesses of Korea Inc *Restructuring Korea Inc* Jang-Sup Shin, Ha-Joon Chang, 2002-12-31 The 1997 South Korean financial crisis not only shook the country itself but also sent shock waves through the financial world at large This impressive book critically assesses the conventional wisdom surrounding the Korean crisis and the performance of the IMF sponsored reform programme Looking first at the strengths and weaknesses of Korea Inc in comparison with other East Asian countries the authors describe the challenges faced by Korea in the 1990s due to the acceleration of globalisation By arguing that the transition attempted by Korea was badly conceived and ill designed *Restructuring Korea Inc* focuses on corporate reform after the crisis that has led to the running up of huge transition costs This snappy informative and readable book has a broad historical overview and with its suggestions for structural change for Korea this book is an important contribution not only to Asian studies but also to the study of financial crises and the political economy of economic reform

**The Global Financial Crisis and the Korean Economy** Jang-Sup Shin, 2013-12-04 The world economy fell into a global financial crisis in 2008 9 and is still jittered by its aftershocks Like other financial crises happened in the world economy it came as a surprise In historical perspective financial crises should be understood as a natural fact of life in the world economy and a more pertinent question that should be posed would be why people so easily forget and do not learn from the historical experience This book deals with the question in two ways First it investigates the frame of mind that distances people from the reality of life At the heart of it it argues that there are wrong perceptions on the working of the world economy in particular the international financial market It summarizes them as the five conventional wisdoms in the international financial market and by critically examining them it draws on the five financial theorems which would provide intellectual pillars for a more realistic understanding of the global financial market Second the book examines in detail the case of an emerging market economy that fell into a financial crisis twice in the recent decade South Korea provides us with an interesting case of emerging market financial crises that came as surprises it faced a financial crisis in 1997 98 after it had been acclaimed as one of East Asian miracle economies and it was again befallen to a crisis during the global financial crisis in 2008 2009 after it was widely regarded as a country that had recovered from the crisis with one of the most successful implementations of the IMF sponsored reforms The book attempts to provide the readers with a realistic understanding of emerging market financial crises by interpreting the recent global financial crisis and the Korean crises with some general concepts manifested in the five financial theorems It also tries to draw more general implications for policy management of emerging market economies

**Institutional Change in Southeast Asia** Fredrik Sjöholm, Jose L.

Tongzon, 2005 Institutional Change in Southeast Asia examines the institutional changes taking place in and challenges facing the region since 1997. The book focuses on determinants to the adjustments and on implementations of the reforms. It also describes various differences in the reform process between countries in the region. Southeast Asia's economic development over the last decades has been impressive. Most of the region achieved consistently high growth rates accompanied by significant structural transformation and industrialization, poverty alleviation and improvements in their overall standard of living as indicated by such social indicators as greater longevity, more widespread delivery of basic education and lower infant mortality rates. However, the crisis that struck Southeast Asia in 1997 had severe economic, social and political consequences in the region. It also threw into doubt the future economic prosperity of the countries in Southeast Asia and raised intriguing questions about the quality of their institutions and their approach to economic development. Sjholm and Tongzon argue that the economies of Southeast Asia need to reform their institutions if the previous rapid development is to continue. The institutional weaknesses have been addressed to different degrees and with different success in the affected countries. Against the backdrop of Southeast Asia's importance in the world economy, it is hardly possible to overestimate the need to understand this process of change.

#### **Late Industrialization, Tradition, and Social Change in South Korea**

Yong-Chool Ha, 2024-03-19 Examines how primary social ties fueled economic growth. South Korea's rapid industrialization occurred with the rise of powerful chaebol family-owned business conglomerates that controlled vast swaths of the nation's economy. Leader Park Chung Hee's sense of backwardness and urgency led him to rely on familial, school and regional ties to expedite the economic transformation. Late Industrialization, Tradition and Social Change in South Korea elucidates how a country can progress economically while relying on traditional social structures that usually fragment political and economic vitality. The book proposes a new framework for macro social change under late industrialization by analyzing the specific process of interactions between economic tasks and tradition through the state's mediation. Drawing on interviews with bureaucrats in the Ministry of Commerce and Industry as well as workers and others, Yong Chool Ha demonstrates how the state propelled industrialization by using kinship networks to channel investments and capital into chaebol corporations. What Ha calls neofamilism was the central force behind South Korea's economic transformation as the state used preindustrial social patterns to facilitate industrialization. Ha's account of bureaucracy democratization and the middle class challenges assumptions about the universal outcomes of industrialization. Late Industrialization, Tradition and Social Change in South Korea is also available in an open access edition DOI 10.6069/9780295753249.

**The New Political Economy of Southeast Asia** Rajah Rasiah, Johannes Dragsbaek Schmidt, 2010-01-01 This well researched book examines the dramatic transformation of Southeast Asian countries from agricultural and mining economies to industrial nations. In doing so it explores the effects of development policy on a number of interdisciplinary issues and the emergence of new social and political pressures created by industrialization. These include their heightened vulnerability to complex economic crises, their

use of sophisticated instruments in the labour process and increased awareness of environmental issues The distinguished authors present a regional and cross border focus on transnational actors and institutions and the policy issues and problems which have a wider impact on spatial configurations in the region This insightful study will appeal to researchers academics and policymakers working on the economics and development of Southeast Asia **Making Environmental Markets**

**Work** Tabitha M. Benney, 2014-11-27 Perhaps the most defining characteristic of the global economy today is the rise of emerging market economies EMEs Many states have experienced rapid economic growth over the past two decades that has led to an increasing share of global wealth Such dramatic changes are highly relevant because they raise important issues about the distribution of global monetary and fiscal power As the EMEs have gained importance in the global economy their influence and significance have grown across a wide range of policy domains One particularly relevant example is the increasingly critical role of EMEs in addressing climate change Contrary to the popular belief that the level of development determines a country's ability to produce positive environmental outcomes this book shows that the variation in environmental outcomes among the EMEs is due to differences in the types of economic institutions prevalent in their economies Since EMEs differ dramatically on a number of variables examining national variations in economic institutions helps explain why international climate policy has been more successful in some countries than in others To assess how variations in capitalism may influence important outcomes this book explores a representative sample of 31 EMEs and employs a mixed method research design that incorporates both conventional regression analysis and Qualitative Comparative Analysis QCA to explain these outcomes The analysis shows that although liberal market economies were expected to perform better than other types of capitalism their performance fell below expectations On the contrary economic institutions related to coordinated types of capitalism like those found in China and Brazil have led to greater Clean Development Mechanism CDM market participation Theoretically informed this book employs innovative ways of understanding a broad set of increasingly important but under studied states in an effort to highlight the interactions found in complex socio political and ecological systems With the growing importance of the EMEs a better understanding of how to design market based policies with them in mind will be required if future efforts across a range of policy issues are to be meaningful and effective *Reimagining Growth* Silvana De Paula, Gary A. Dymksi, 2005-05-17 In this volume a group of eminent economists and other social scientists seek to present an innovative new approach to economic development drawing in part from certain heterodox intellectual traditions within economics as well as from the other social sciences The intention is to point the way theoretically to a much more sophisticated understanding of economic development The ultimate prize they show by grounding theory in a more accurate analysis of social change is policies that really will deliver higher economic growth and greater social justice worldwide *A Comparative Study of East Asian Capitalism* Hong Yung Lee, 2014 This book represents an initial attempt to compare China Japan and South Korea three close geographical and

cultural neighbors whose developmental trajectories though divergent in the past have been moving more recently toward convergence *Contemporary Southeast Asia*, 2004 **Three Essays on Credit Contracts** Sung-Guan Yun, 2010

Forthcoming Books Rose Army, 2003 **After the Storm** Jomo Kwame Sundaram, 2004 After the Storm discusses restructuring and growth strategies adopted in Indonesia Malaysia Thailand and South Korea after the currency and financial crisis of 1997 98 These four Asian economies were the most adversely affected despite achieving rapid growth in the 1970s and 1980s with low inflation and current account surpluses Although macroeconomic fundamentals in these countries were relatively sound prior to the crisis early analyses of the crisis dwelled on the failure of corporate governance currency controls and immature financial institutions and infrastructure in some countries The book offers fresh insights into the causes of the crisis and postcrisis restructuring the growth strategies adopted and domestic initiatives taken by these countries It also reveals why reforms recommended by the IMF World Bank and others were met with resistance thereby contributing to the ongoing discourse on the effects of globalisation The East Asian High-tech Drive Yunpeng Zhu, Hal Hill, 2006 Argues that to maintain the growth momentum the more advanced East Asian economies need to pay particular attention to policies designed to upgrade their industrial capabilities This book argues that effectively functioning institutions predictable commercial policies and more are essential for growth and technological development **Bibliographic Index**
