Rethinking Sustainability Power Knowledge And Institutions:

Rethinking Sustainability Jonathan M. Harris,2000 Environmental and Natural Resource Economics Jonathan M. Harris,Brian Roach,2013-07-05 Sustainable Development Rumen Gechev,2005 The criteria for sustainable development have become a decisive factor in the formulation and assessment of economic policy models By its nature sustainable development is a multidimensional category therefore it requires an interdisciplinary approach This study is focused on the economic aspects of sustainable development However the analysis includes the interdependences of the noneconomic dimensions The author proposes a new definition for sustainable development that incorporates those dimensions and suggests a new GDP matrix that better integrates the quantitative and the qualitative parameters of the economic output including its effect on the environmental equilibrium **Quality of Life in Urban Landscapes** Roberta Cocci Grifoni,Rosalba D'Onofrio,Massimo Sargolini,2017-12-14 This volume introduces an innovative tool for the development of sustainable cities and the promotion of the quality of life of city inhabitants It presents a decision support system to orient public administrations in identifying development scenarios for sustainable urban and territorial transformations The authors have split the volume into five parts which respectively describe the theoretical basis of the book the policies in question and indicators that influence them the decision support system that connects indicators to policies the case study of Ancona Italy and potential future directions for this work This volume is based on transdisciplinary research completed in May 2016 that involved about 40 researchers at The University of Camerino Italy and other European universities With purchase of this book readers will also have access to Electronic Supplementary Material that contains a database with groups of indicators of assessment of urban quality of life and a toolkit containing the data processing system and management information system used in the book s case study **Handbook of Research on Institution Development for Sustainable and Inclusive Economic Growth in Africa** Osabuohien, Evans S.,Oduntan, Emmanuel A.,Gershon, Obindah,Onanuga, Olaronke,Ola-David, Oluyomi,2020-12-04 African countries are pursuing a number of development agendas toward achieving economic growth that is inclusive pro poor and sustainable particularly the type that can unleash the potential of women and booming youthful populations However available evidence shows that many African countries have experienced economic hardships and have performed more poorly than other developing and emerging countries in the global south The Handbook of Research on Institution Development for Sustainable and Inclusive Economic Growth in Africa is an essential research publication that provides comprehensive research on the processes of building viable institutions in Africa that will serve as the fulcrum for utilizing and managing resources as well as promoting economic growth that is inclusive and sustainable Featuring topics such as climate change financial development and poverty this book is ideal for researchers policymakers developers economic professionals academicians government officials business professionals and students **A Survey of Sustainable Development** Jonathan Harris,Timothy Wise,Kevin Gallagher,Neva R. Goodwin,2013-04-16 Perpetual economic

growth is physically impossible on a planet with finite resources Many concerned with humanity's future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals Sustainable development brings together elements of economics public policy sociology ecology resource management and other related areas and while the term has become quite popular it is rarely defined and even less often is it understood A Survey of Sustainable Development addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic The volume offers ten sections on topics including economic and social dimensions of sustainable development the North South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature followed by two to three page abstracts of the most important articles or book chapters on the topic A Survey of Sustainable Development is the sixth and final volume in the Frontier Issues of Economic Thought series produced by the Global Development And Environment Institute at Tufts University Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study The book is an essential reference for students and scholars concerned with economics environmental studies public policy and administration international development and a broad range of related fields A Civil Economy Severyn T. Bruyn, 2009-11-10 An accessible overview of the concept of the civil economy and how it works **The American Economic Review**, 2003 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association Appraising Sustainable Development Asit K. Biswas, Cecilia Tortajada, 2005 The book discusses the concept of sustainable development specifically with regard to water resources management and environmental challenges therein Sustainable development is studied from the perspective of its applicability to a heterogeneous world This volume raises questions for the development community to consider in the context of the coexistence of pluralism of paradigms The Journal of Environment & Development, 2001

Grassroots Struggles for Sustainability in Central America Lynn Horton, 2007 In recent years sustainable development has emerged as a central goal of the World Bank and grassroots activists alike In Grassroots Struggles for Sustainability in Central America Lynn R Horton explores the implications of this new often contested discourse and related policies for Central America's rural and indigenous poor Drawing on the testimony of leaders and residents of three communities in Nicaragua Costa Rica and Panama Horton explores grassroots assumptions values and practices of sustainable development and in particular the ways in which they overlap with or challenge international financial

institutions discourse of sustainability With a comparative empirical approach Horton also analyzes dominant practices linked to sustainable development neoliberal reforms project interventions and environmental protection She reveals how these practices support or undermine economic cultural and political opportunities for the rural and indigenous poor and impact these communities advancement of their own visions of sustainability Finally the author explores processes of empowerment that enable communities to articulate and put into practice local visions of sustainability which contribute toward broader social and structural transformations Grassroots Struggles for Sustainability in Central America will interest sociologists anthropologists and others who study the theory and practice of sustainable development Journal of Economic Literature ,2002 *Globalization, Universities and Issues of Sustainable Human Development* Jean Larson Pyle,Robert Forrant,2002 This collection of articles addresses the changing role of the university as a promoter of sustainable human development in an era of increasing globalization The 12 articles written by professors in a range of related disciplines target readers interested in regional studies economic development globalization and community development Editors Pyle and Forrant both are professors in the department of regional economic and social development U of Massachusetts Lowell Topics include sustainable regional development experiences from Slovenia recent developments in Irish based industry and grow your own skills in the new economy It's Legal But It Ain't Right Nikos Passas,Neve R. Goodwin,2004 Many U S corporations and the goods they produce negatively impact our society without breaking any laws We are all too familiar with the tobacco industry s effect on public health and health care costs for smokers and nonsmokers as well as the role of profit in the pharmaceutical industry s research priorities It s Legal but It Ain t Right tackles these issues plus the ethical ambiguities of legalized gambling the firearms trade the fast food industry the pesticide industry private security companies and more Aiming to identify industries and goods that undermine our societal values and to hold them accountable for their actions this collection makes a valuable contribution to the ongoing discussion of ethics in our time **After the End of History** Robert E. Lane,2006 A creative presentation of Lane s career research as an ongoing conversation between two fictitious social scientists with opposing views Architectural Practice of Sustainability Rose Marie Lane,2006 *Frontiers in Ecological Economic Theory and Application* Jon David Erickson,John M. Gowdy,2007 Research on the cutting edge of economics ecology and ethics is presented in this timely study Building from a theoretical critique of the tradition of cost benefit analysis the contributors lay the foundation for a macroeconomics of environmental sustainability and distributive justice Attention is then turned to three of the most critical areas of social and environmental applied research biodiversity climate change and energy The contributors redefine progress away from growth and toward development To this end the first section of the book tackles the dominant framework used in the US today to evaluate tradeoffs between economic growth and its inherent externalities Succeeding chapters cover a wide variety of studies related to biodiversity health and energy Each section is anchored with overviews by top scholars in these areas including Herman

Daly Carl McDaniel Stephen Schneider and Nathan Hagens and followed by detailed analyses reflecting the transdisciplinary approach of ecological economics Students and scholars of ecological environmental and natural resource economics sustainability sciences and environmental studies will find this book of great interest Non profit and government agencies in search of methods and cases that merge the study of ecology and economics will also find the analyses of great practical value

Books in Print Supplement ,2002

Ascent to Freedom Glen T. Martin,2008 *Ascent to Freedom* develops a philosophical framework for democratic world law by drawing on the scientific revolutions of the twentieth century the history of philosophy of law and contemporary discussions of law democracy and human rights It traces the history of the philosophy of law from ancient times to the present showing the progressive development of democratic thought that culminates in the imperative for global democracy It examines the legitimacy of the dominant institutions in the contemporary world monopoly capitalism and the nation state system and points beyond these destructive fragmenting institutions to a holistic approach for human affairs It concludes by developing the parameters and the likely consequences of a conversion to democratic world law for protecting the environment and human rights as well as creating a world system of peace and prosperity for everyone on Earth *Ascent to Freedom* lays out both the practical and conceptual foundations for a transformed world order that can deal directly with our multiple global crises while creating peace and prosperity on Earth

Encyclopedia of Sustainability Robin Morris Collin,Robert W. Collin,2010 Surveys the environmental economic and social justice impact of sustainable development covering topics ranging from green tourism and greenwashing to permaculture and voluntary simplicity
