Confronting Technology Matthew T. Prior, 2020-03-16 We are living through a digital revolution which already touches every area of life and will continue to shape the future in as yet unforeseen ways Digital technologies are an ordinary part of daily life and yet they also present an unprecedented challenge to Christians to articulate a biblical theological framework to navigate times of rapid change The work of the French theologian Jacques Ellul is a theological time bomb primed for times like these Accounts of Ellul's career often divide off his sociology and theology but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God tackling the phenomenon he named technique the pursuit of maximal power and efficiency implicit in the technological enterprise with a profound depth of biblical and ethical insight Centering himself on the apocalypse or revelation of Jesus Christ in history Ellul offers a monumental timely though far from flawless contribution to contemporary ethical debates about the uses and abuses of technologies His work blazes a trail that Christians and all concerned for the future would do well to follow as we avoid both the naivety of technological neutrality and the dread of technological determinism The Virginia Magazine of History and Biography Philip Alexander Bruce, William Glover Stanard, 1897 *The Elements of Continuum Mechanics* C. Truesdell, 2012-12-06 The lectures here reported were first delivered in August and September 1965 for the Department of Mechanical and Aerospace Engineering at Syracuse University New York under the sponsorship of the New York State Science and Technology Foundation Lectures 16 and 22-23 are revised from a version prepared by Professor Kin N Tong on the basis of a transcription of the lectures kindly provided by Professor S Eskinazi The remainder of the text has been written out afresh from my own notes Much of the same ground was covered in my lectures to the Australian Mathematical Society's Summer Research Institute at Melbourne in January and February 1966 and for the parts affected the text conforms to this latter presentation I am grateful to Professors C C Wang and K N Tong for criticism of the manuscript These lectures constitute a course not a treatise Names are attached to theorems justly to the best of my knowledge but are not intended to replace a history of the subject or references to the sources *Report of the Commissioner of Education* United States.
