Privatizing Africa's Infrastructure Promise And Challenge:

Privatizing Africa's Infrastructure Michel Kerf, Warrick Smith, 1996-01-01 This paper examines the promise and challenge of infrastructure privatization in sub Saharan Africa with particular emphasis on power telecommunications water rail ports and airports The paper places primary emphasis on mobilizing private investment in infrastructure To realize the potential of infrastructure privatization in sub Saharan Africa four main challenges must be addressed a concerns over market size affordability and payment risks b establishing adequate legal and regulatory frameworks c dealing with non commercial risks and d mobilizing local finance The paper examines these four areas and gives elements of a future strategy for the World Bank Group

The Privatization Challenge Pierre Guislain, 1997 analisa os aspectos legais e institucionais e apresenta uma lista com a legisla o sobre privatiza o em 112 paises

Deepening Structural Reform in Africa Ms. Laura Wallace, 1997-05-13 As Africa looks for ways to deepen and accelerate the economic reform process what lessons can East Asia offer this book edited by Laura Wallace records the proceedings of a seminar that involved a dynamic exchange of experiences by policy makers and senior government officials from Africa and East Asia and senior staff of international organizations The seminar addressed themes such as the sequencing and pacing of structural reforms the need for a broad political and social acceptance of change and reform and the need for transparency and accountability in economic management

Annual World Bank Conference on Development Economics 1998 Boris Pleskovic, Joseph E. Stiglitz, 1999 The 1998 Annual World Bank Conference on Development Economics the tenth anniversary was held at the Bank on April 20 21 1998 The discussions focused on four areas of inquiry 1 the role of geography in countries success 2 the role of effective competition and regulatory policies 3 the causes of financial crises and ways to prevent them and 4 the effects of ethnic diversity on democracy and growth The welcoming address by World Bank President James D Wolfensohn the opening remarks by chief Economist Joseph Stiglitz and the tenth anniversary address by the International Monetary Fund Deputy Managing Director Stanley Fischer all focused both on the role of the conference and on the changing perspectives for development

Development Centre Seminars Regional Integration in Africa OECD, Asian Development Bank, 2002-04-25 Regional integration and co ordination are not a panacea but they could hold the key to African countries long awaited participation in the world economy This was one of the conclusions of the second International Forum on African Perspectives

Leading Issues in Competition, Regulation, and Development Paul Cook, 2004-01-01 The promotion of liberalized and deregulated markets by bilateral and multilateral aid donors and by global institutions such as the WTO has led to significant attention being paid to competition and regulatory reforms in developing economies The process of reform involves the transfer and diffusion of market models derived from practice and theory in developed countries However in developing countries regulation needs to do more than simply promote competitiveness and consumer interests it also needs to ensure that the market nurtures development By rigorously examining the numerous impacts of regulation this book will help to fill

a significant gap in the literature on economic and social development The book now available in paperback draws together contributions from leading experts across a range of disciplines including economics law politics and governance public management and business management The authors begin with an extensive overview of the issues of regulation and competition in developing countries and carefully illustrate the important themes and concepts involved Using a variety of country and sector case studies they move on to focus on the problems of applicability and adaptation that are experienced in the process of transferring best practice policy models from developed to developing countries The book presents a clear agenda for further empirical research and is notable for its rigorous exploration of the links between theory and practice Although there is substantial interest in competition and regulation as yet there has been relatively little investigation of these issues in developing economies This book redresses the balance and will be a valuable resource for researchers academics teachers and students interested in development economics and development studies It will also be of great relevance for practitioners and policymakers working in the fields of competition policy and regulatory reform
