Problem Of Knowledge Philosophy Science And History Since Hegel Transl By W Woglom:

The Problem of Knowledge. Philosophy, Science, and History Since Hegel ... Translated by William H. Woglom ... and Charles W. Hendel, Etc Ernst Cassirer, 1950 *The Problem of Knowledge* Ernst Cassirer, 1950 *The Problem of Knowledge* Ernst Cassirer, 1950-01-01 Cassirer employs his remarkable gift of lucidity to explain the major ideas and intellectual issues that emerged in the course of nineteenth century scientific and historical thinking The translators have done an excellent job in reproducing his clarity in English There is no better place for an intelligent reader to find out with a minimum of technical language what was really happening during the great intellectual movement between the age of Newton and our own New York Times Publisher description *John M. Krois. Bildkörper und Körperschema* Horst Bredekamp, Marion Lauschke, 2012-11-19 Im Zentrum der Aufsätze des international renommierten Cassirerforschers John Michael Krois zu Cassirer Peirce Wind und Warburg sowie zu kognitionen und bildwissenschaftlichen Fragestellungen stehen die verkörperungstheoretische Transformation der Philosophie und die Bildkompetenz des Menschen Sie zielen darauf ab die dualistische Perspektive der Bewusstseinsphilosophie durch ein komplexes Verhältnis von gegenseitiger Beeinflussung von Bewusstsein und Körper im Prozess des aktiven Navigierens in der Welt und der Schaffung symbolischer Welten zu ersetzen Aus dem Inhalt Kunst und Wissenschaft in Edgar Winds Philosophie der Verkörperung Cassirers Prototype and Model of Symbolism Die Universalität der Pathosformeln Cassirers philosophy of Biology The Semiotic Programs of Peirce and Cassirer Für Bilder braucht man keine Augen Synesthesia and the Theory of Signs Philosophical anthropology and the embodied cognition paradigm Tastbilder Experiencing Emotion in Depiction Körperbilder und Bildschema Enactivism and Embodiment in Picture Acts u a [Critique of the Quantum Power of Judgment](#) Hernán Pringe, 2011-10-18 The Critique of the Quantum Power of Judgment analyzes the a priori principles which underlie the empirical knowledge provided by quantum theory In contrast to other transcendental approaches to quantum physics none of the transcendental principles established by Kant is modified in order to cope with the new epistemological situation that arises with the assumption of the quantum postulate Rather by considering Bohr's views it is argued that classical concepts provide the mathematical formalism of quantum theory with physical reference through symbolic analogies in the strict Kantian sense The main result of the investigation is the determination of the highest principle under which quantum objects are subsumed This principle states that the conditions of the possibility of the systematic unity of contextual experience are at the same time the conditions of the possibility of quantum objects Upon this principle rests the possibility of any a priori synthetic knowledge of quantum objects Therefore the Critique of the Quantum Power of Judgment yields the prolegomena to any future quantum metaphysics *Ernst Cassirer* Edward Skidelsky, 2011-11-13 This is the first English language intellectual biography of the German Jewish philosopher Ernst Cassirer 1874 1945 a leading figure on the Weimar intellectual scene and one of the last and finest representatives of the liberal idealist tradition Edward Skidelsky traces the development of Cassirer's thought in

its historical and intellectual setting He presents Cassirer the author of *The Philosophy of Symbolic Forms* as a defender of the liberal ideal of culture in an increasingly fragmented world and as someone who grappled with the opposing forces of scientific positivism and romantic vitalism Cassirer's work can be seen Skidelsky argues as offering a potential resolution to the ongoing conflict between the two cultures of science and the humanities and between the analytic and continental traditions in philosophy The first comprehensive study of Cassirer in English in two decades this book will be of great interest to analytic and continental philosophers intellectual historians political and cultural theorists and historians of twentieth century Germany

Hans Christian Ørsted and the Romantic Legacy in Science Robert M. Brain, Robert S. Cohen, Ole Knudsen, 2007-09-28 This volume owes its origin to the perception of a puzzling paradox Hans Christian Ørsted the great Danish scientist and philosopher was one of the founders of modern physics through his experimental discovery in 1820 of the interaction of electricity and magnetism a key step and model for the further unification of the forces of nature Followers such as Maxwell and Einstein were and today searchers worldwide are enchanted by the hope for a completion of that grand program In addition to Ørsted's discovery of electromagnetism his work in science included other fields chiefly high pressure physics and acoustics Moreover he belonged to that fascinating group of seekers who were deeply engaged in the Romantic tradition of the Nature Philosophers influenced by Immanuel Kant and by religious literary and aesthetic currents The scientific and philosophical speculations by Ørsted and his circle also quickly stimulated the imagination of other philosophers and scientists Among the latter were prominently André-Marie Ampère and Michael Faraday whose work launched the transformation of civilization often called the Second Industrial Revolution based on the invention of motors generators and the pervasiveness of electricity in modern life

The Neo-Kantian Reader Sebastian Luft, 2024-11-01 The latter half of the nineteenth and the early part of the twentieth century witnessed a remarkable resurgence of interest in Kant's philosophy in Continental Europe the effects of which are still being felt today The Neo-Kantian Reader is the first anthology to collect the most important primary sources in Neo-Kantian philosophy with many being published here in English for the first time It includes extracts on a rich and diverse number of subjects including logic epistemology metaphysics philosophy of science and transcendental idealism Sebastian Luft together with other scholars provides clear introductions to each of the following sections to the authors as well as to each text placing them in historical and philosophical context the beginnings of Neo-Kantianism including the work of Hermann von Helmholtz Otto Liebman Friedrich Lange and Hermann Lotze the Marburg School including Hermann Cohen Paul Natorp and Ernst Cassirer the Southwest School including Wilhelm Windelband Heinrich Rickert Emil Lask and Hans Vaihinger responses and critiques including Moritz Schlick Edmund Husserl Rudolf Carnap and the Davos dispute between Martin Heidegger and Ernst Cassirer The Neo-Kantian Reader is essential reading for all students of Kant nineteenth and twentieth century philosophy history and philosophy of science and phenomenology as well as to those studying important philosophical movements such as logical positivism and analytic philosophy and its
