Comparing Governance Systems in Cuban Cooperatives: A Study of Producer and Worker Cooperatives in Agriculture, Industry, and Services

Camila Piñeiro Harnecker 

8.1 Introduction

Cuba has the second highest number of cooperatives in the Americas relative to population, and also one of the highest numbers of producer and worker cooperatives worldwide relative to population.¹ While most Cuban cooperatives are in agriculture, they are also increasingly observed in industry and services over the last decade.

The importance of cooperatives for the Cuban revolutionary process has varied according to the hegemony gained within leadership by the most emancipatory or transformative tendencies of the Revolution.

¹ After Venezuela (where around 15,000 cooperatives are estimated to be active), Cuba has the second highest number of cooperatives relative to its population in the Americas.

Producer Cooperatives And Labormanaged Systems 2 Vol Set:

Producer Cooperatives and Labor-managed Systems David L. Prychitko, Jaroslav Vanek, 1996 Since 1958 the economic theory of the participatory or labor managed firm and its performance compared to capitalist firms has exploded into a vast literature comprising several hundred articles Indeed as one early contributor has recently remarked the theory has become a new discipline in itself *Producer Cooperatives and Labor Managed Systems* provides for the first time a careful selection of the most significant theoretical and empirical contributions to this burgeoning field and promises to become a valuable research tool and reference volume

Producer Cooperatives and Labor-managed Systems: Case studies David L. Prychitko, Jaroslav Vanek, 1996

Producer Cooperatives as a New Mode of Production Bruno Jossa, 2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and poor However since the appearance of Benjamin Ward s seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav Vanek s definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre existing relation between capital and labour Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would constitute a form of market socialism Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future

Subject Guide to Books in Print, 1996

Labour Managed Firms and Post-Capitalism Bruno Jossa, 2016-11-25 This book illustrates and discusses the major points of the economic theory of producer cooperatives its evolution since the 1950s and links with Marxian theory Most importantly this book demonstrates that a system of producer cooperatives offers a wealth of advantages compared to capitalism There is general agreement that the main benefit of this form of economic democracy is that people allowed to freely pursue their interests are happier than those acting on somebody else s instruction The author argues that a system of democratic firms would eradicate classical high wage unemployment and scale down both Keynesian and structural unemployment levels
