**Dictionary of Modern American Philosophers** John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

*Selling Out* Howard Woodhouse, 2009-09-01 Selling Out demonstrates that the logics of value of the market and of universities are not only different but opposed to one another By introducing the reader to a variety of cases some well known and others not Woodhouse explains how academic freedom and university autonomy are being subordinated to corporate demands and how faculty have attempted to resist this subjugation He argues that the mechanistic discourse of corporate culture has replaced the language of education subject based disciplines and the professors who teach them have become resource units students have become educational consumers and curricula have become program packages

Graduates are now products and competing in the global economy has replaced the search for truth
