As well as highlighting a wealth of user friendly data science tools, the book also includes some example code in two of the most popular programming languages, R and Python, to demonstrate the ease with which the information professional can move beyond the graphical user interface and achieve significant analysis with just a few lines of code. After reading, readers will understand the growing importance of data science, the role of the information professional in data science, some of the most important tools and methods that information professionals can use. Bringing together the growing importance of data science and the increasing role of information professionals in the management and use of data, *Practical Data Science for Information Professionals* will provide a practical introduction to the topic specifically designed for the information community. It will appeal to librarians and information professionals all around the world, from large academic libraries to small research libraries. By focusing on the application of open source software, it aims to reduce barriers for readers to use the lessons learned within.

Business Object Design and Implementation Jeffrey V. Sutherland, Dilip Patel, Cory Casanave, Joaquin Miller, Glenn Hollowell, 2012-12-06 Over the past 10 years, object technology has gained widespread acceptance within the software industry. Within a wider context, however, it has made little impact on the core applications which support businesses in carrying out their tasks. This volume contains a collection of papers establishing the need for Business Objects, with particular reference to work undertaken by the Object Management Group (OMG). The emphasis is on defining an agenda for establishing Business Object standards and architectures for developing software technology to support Business Objects applications and managing object oriented development projects. The wide variety of papers presented and their authors' expertise make this book a significant contribution to the development of Business Objects and their management.
