Programming the Built Environment (Routledge Revivals) Wolfgang F. E. Preiser,2015-07-24 Architectural programming the analysis of any given environment to satisfy users needs has become a given prerequisite to the design process The programming process is often a complicated one users present and future needs must be identified space allowances often predetermined must be considered equipment must be accommodated all in the most cost effective way possible The variety of user groups is as wide as the variety of functions architecture can shelter moreover the different structures and needs of clients that fall within the same use classification differs so greatly that every program presents a new challenge You cannot for example use the same program for every hospital you design In *Programming the Built Environment* first published in 1985 noted architect Wolfgang F E Preiser has compiled a wide range of architectural programs demonstrating applications of basic principles for different client groups This book will be of interest to students of architecture and planning

Interface Oral Health Science 2014 Keiichi Sasaki,Osamu Suzuki,Nobuhiro Takahashi,2014-11-27 The Tohoku University Graduate School of Dentistry first introduced the concept of Interface Oral Health Science designed to establish

and maintain healthy oral cavities which are home to a number of mixed systems Included in those systems are 1 host tissues such as teeth mucosa muscle and bone 2 parasites and microorganisms cohabiting the surfaces of the oral cavity and 3 biomaterials that are used for the rehabilitation of oral functions In addition 4 these systems are subject to severe and complex mechanical forces Therefore it is critical to promote dental studies that integrate a wide range of interdisciplinary research as medicine agriculture material science engineering and pharmacology With this incentive international symposiums for interface oral health science have been held several times in the past The concept has since refined and expanded the result being the Biosis Abiosis Intelligent Interface and projects aiming at the creation of highly functional and autonomic intelligent interfaces are ongoing This book brings together a number of studies on incentives and projects by leading authors Topics include biosis abiosis interface of dental implants biomaterials in interface science biomedical engineering interface and cell manipulation and tissue regeneration Readers not only from the field of dentistry but also many related areas will find this book a valuable resource

Object-Oriented Construction Handbook Heinz Züllighoven, Robert F. Beeger, 2005 Object oriented programming OOP has been the leading paradigm for developing software applications for at least 20 years Many different methodologies approaches and techniques have been created for OOP such as UML Unified Process design patterns and eXtreme Programming Yet the actual process of building good software particularly large interactive and long lived software is still emerging Software engineers familiar with the current crop of methodologies are left wondering how does all of this fit together for designing and building software in real projects This handbook from one of the world s leading software architects and his team of software engineers presents guidelines on how to develop high quality software in an application oriented way It answers questions such as How do we analyze an application domain utilizing the knowledge and experience of the users What is the proper software architecture for large distributed interactive systems that can utilize UML and design patterns Where and how should we utilize the techniques and methods of the Unified Process and eXtreme Programming This book brings together the best of research development and day to day project work The strength of the book is that it focuses on the transition from design to implementation in addition to its overall vision about software development Bent Bruun Kristensen University of Southern Denmark Odense
