2011-2012 Assessment of the Army Research Laboratory National Research Council, Division on Engineering and Physical Sciences, Laboratory Assessments Board, Army Research Laboratory Technical Assessment Board, 2013-04-09 The charge of the Army Research Laboratory Technical Assessment Board ARLTAB is to provide biennial assessments of the scientific and technical quality of the research development and analysis programs at the Army Research Laboratory ARL The ARLTAB is assisted by six panels each of which focuses on the portion of the ARL program conducted by one of ARL's six directorates¹ When requested to do so by ARL the ARLTAB also examines work that cuts across the directorates For example during 2011-2012 ARL requested that the ARLTAB examine crosscutting work in the areas of autonomous systems and network science The overall quality of ARL's technical staff and their work continues to be impressive Staff continue to demonstrate clear passionate mindfulness of the importance of transitioning technology to support immediate and longer term Army needs Their involvement with the wider scientific and engineering community continues to expand Such continued involvement and collaboration are fundamentally important for ARL's scientific and technical activities and need to include the essential elements of peer review and interaction through publications and travel to attend professional meetings including international professional meetings In general ARL is working very well within an appropriate research and development niche and has been demonstrating significant accomplishments as exemplified in the following discussion which also addresses opportunities and challenges

Robotics, Mechatronics, and Artificial Intelligence Newton C. Braga, 2001-11-22 Accessible to all readers including students of secondary school and amateur technology enthusiasts Robotics Mechatronics and Artificial Intelligence simplifies the process of finding basic circuits to perform simple tasks such as how to control a DC or step motor and provides instruction on creating moving robotic parts such as an eye or an ear Though many companies offer kits for project construction most experimenters want to design and build their own robots and other creatures specific to their needs and goals With this new book by Newton Braga hobbyists and experimenters around the world will be able to decide what skills they want to feature in a project and then choose the right building blocks to create the ideal results In the past few years the technology of robotics mechatronics and artificial intelligence has exploded leaving many people with the desire but not the means to build their own projects The author's fascination with and expertise in the exciting field of robotics is

demonstrated by the range of simple to complex project blocks he provides which are designed to benefit both novice and experienced robotics enthusiasts The common components and technology featured in the project blocks are especially beneficial to readers who need practical solutions that can be implemented easily by their own hands without incorporating expensive complicated technology Accessible to technicians and hobbyists with many levels of experience and written to provide inexpensive and creative fun with robotics Appeals to all sorts of technology enthusiasts including those involved with electronics computers home automation mechanics and other areas Experimental Robotics V Alicia Casals, Anibal T. de Almeida, 1998-03-25 Experts in the field of experimental robotics come together in this book to share the results of their most recent research projects Both theoretical ideas and advances with practical applications are discussed In particular state of the art research in fascinating areas such as underwater environments civil engineering space and medicine is focused upon Research aimed at improving methodologies and techniques in robot control programming and planning shows the way to improve the use of robots for complex problems Techniques for human robot co operation are also looked at there are a number of areas in which combining the intelligence and adaptability of humans and the accuracy and reliability of robots can have remarkable results This book will enable readers to update their knowledge of experimental robotics and find out particularly about the research that has been going on over the last two years and the research that is likely to continue in the future **Machine Intelligence and Robotics: Report of the NASA Study Group** ,1980 **Artificial Intelligence Applications in Research and Development** Richard Kendall Miller, Terri C.
