Privatization A Legal Perspective:

Privatisation ,1996-01-01 *Legal Aspects of Privatisation* Bulent Seven,2002 The main aims of this thesis are as follows
a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades *Israel Privatization Programs and Regulations Handbook Volume 1 Strategic and Practical Information* IBP USA,2013-08 2011 Updated Reprint Updated Annually Israel Privatization Programs and Regulations Handbook **Global Privatization Laws and Regulations Handbook Volume 1 USA - Important Regulations, Projects and Developments** IBP, Inc.,2016-01-25 2011 Updated Reprint Updated Annually Global Privatization Laws and Regulations Handbook Vol 1 United States Public Accountability Michael D. digitalization of processes and contracts private public arbitration and further use of international instruments It also considers the implications of comparative European law convention law and other legal domains particularly international standards on contract law in the MENA region The book suggests how international legal standards can be integrated within contract law and how a harmonious contract law framework can thus be achieved Through analyzing ICSID case law the book argues that unification of contract law principles in the MENA region is a considerable step towards achieving legitimate expectations of foreign investors It argues further that global contract law is underway The book will be of interest to students and scholars in the field of international contract law public law and international law in Egypt and MENA countries

Public Private Partnership Contracts
Mohamed Ismail, 2020-03-18 This book provides a comprehensive overview of the law surrounding PPPs in the Middle East and North African region The significance of liberalised and integrated Public Private Partnership Contracts as an essential component of the world legal and policy order is well documented The regulation of PPPs is justified economically to allow for competition in the relevant public service and to achieve price transparency thus resulting in significant savings for the

public sector In parallel to the economic justifications legal imperatives have also called for the regulation of PPPs in order to allow free movement of goods and services and to prohibit discrimination on grounds of nationality The need for competitiveness and transparency in delivering public services through PPPs is considered a safeguard to achieve international standards in delivering public utility services First it assesses the compatibility of the current PPPs legislation and regulation in the MENA region with the international standards of legislation and regulation prevalent in many other countries including the UK France and Brazil Secondly it compares the practices in the MENA region with those of international bodies such as the OECD and World Bank Comparisons are then made between the MENA countries and those in Europe and Asia with regard to the influence of culture policy and legal globalization The book will be of interest to scholars and students in the field of international contract law public law and state contracts finance law and private law
