knowledge and skills that law students will require in order to prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the era of globalization the contributions find that law schools can and must adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about They find that law schools need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms Bridging the gap between theory and practice this book makes a significant contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future It will be of great interest to academics and students of comparative legal studies and legal education as well as policy makers and practitioners

Trubek, David B. Wilkins, 2018-01-11 Brings together experts from North and South to examine the impact of globalization on the corporate legal environment in Brazil *Access to Justice* Deborah L. Rhode, 2004-09-23 Equal Justice Under Law is one of America's most proudly proclaimed and widely violated legal principles But it comes nowhere close to describing the legal system in practice Millions of Americans lack any access to justice let alone equal access Worse the increasing centrality of law in American life and its growing complexity has made access to legal assistance critical for all citizens Yet according to most estimates about four fifths of the legal needs of the poor and two to three fifths of the needs of middle income individuals remain unmet This book reveals the inequities of legal assistance in America from the lack of access to educational services and health benefits to gross injustices in the criminal defense system It proposes a specific agenda for change offering tangible reforms for coordinating comprehensive systems for the delivery of legal services maximizing individual's opportunities to represent themselves and making effective legal services more affordable for all Americans who need them
