Specific media studied include the Voice of America Radio Moscow Monte Carlo Radio the BBC Voice of the Arabs Voice of the Arab Homeland Radio of the Islamic Republic of Iran and the local broadcasting services of each Gulf country Dr Kazan presents both a review and a critique of classical and mainstream theories of modernization in general and those of development communication in particular to determine the degrees of validity relevance and applicability of these theories to the development situation of Gulf societies Furthermore Kazan develops an integrated mass media effects model that factors in both macro and micro processes that are dynamically interconnected interdependent and continuously evolving and changing to account for the impact of media on modernity and development Media impact according to this model should be understood not only in terms of the socio economic and psychological characteristics of the media audience but also in terms of the dynamics of the whole socio cultural and political system Kazan concludes his study with a critique of the Western paradigm of development and presents the outline of a new paradigm of development that is more in harmony with the new physics with the ecosystems and with social justice
