**The Problem of Lemuria** Lewis Spence, 2002-07-15 Presents evidence that an advanced civilization once existed in the area of the Pacific Ocean in ancient times but has since vanished due to cataclysmic activity Reveals supporting evidence from many disciplines including geology archaeology mythology biology linguistics including word origins and the transmission of various customs **The Problem of Lemuria the Sunken Continent of the Pacific** Lewis Spence, 1952

**Contesting Earth's History in Transatlantic Literary Culture, 1860-1935** Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists long-standing effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes **The**
