Un estudio comparado entre España y Puerto Rico* Fernando L. Lugo Camacho,2021-05-25 En este libro se presenta un análisis comparativo de una selección de leyes de consolidación fiscal aprobadas luego del estallido de la crisis financiera mundial de 2008 Los eventos que impulsaron estas leyes fueron resultado de la interrelación económica creciente de los mercados mundiales y por esto se inicia el escrito con una breve discusión de la globalización económica y sus efectos sobre los ordenamientos jurídicos Los ordenamientos bajo comparación provienen de tradiciones jurídicas diferentes por lo que se expone un desarrollo histórico y sistemático de los mismos La crisis exige la intervención de los gobiernos para intentar reestablecer la actividad económica luego de su severa contracción Se explican por tanto las justificaciones para dicha intervención De paso se destaca el papel que ha jugado la crisis el estudio del Derecho y la Economía y las diferencias en su desarrollo tanto en España como en los Estados Unidos y se apunta a la necesidad de incluir en estos estudios aspectos macroeconómicos para que el diseño de las regulaciones y las leyes puedan tener más efectividad particularmente bajo situaciones especiales como las de una recesión severa La política fiscal fue fundamental durante la crisis Por esto se desarrolla una discusión más detallada de esta política y sus instrumentos junto con la relación entre déficits deuda y

sostenibilidad fiscal y se presentan las medidas extraordinarias de consolidación fiscal que se utilizaron durante la crisis. Se apuntan algunos efectos de estas consolidaciones en las regiones insulares pertenecientes a países de mayor tamaño particularmente en Canarias y en Puerto Rico. El trabajo continúa con un breve recuento de los antecedentes detonantes y desenvolvimiento de la crisis en términos generales y sus particularidades para España y para Puerto Rico. Finalmente se expone un análisis específico y comparativo sobre las leyes seleccionadas de consolidación fiscal aprobadas en España y en Puerto Rico. La Hueca and Punta Candelero around 2300 years ago. The primary objectives of this investigation were among others to characterize for the first time the agro-economy of these communities and to interpret the role of plants as humanized natural objects which were consciously used during the movement of these peoples across the insular Caribbean. This investigation offers the first archaeological interpretation supported by a systematic archaeobotanical study of some of the socio-cultural processes that made it possible for two Huecoid communities to persist and evolve in a dynamic landscape of human and natural interactions in the northern Antilles.
