Directions For Mathematics Research Experience For Undergraduates Yanir A Rubinstein, Mark A

Peterson, 2015-09-29 The collection transcends the traditional institutional division lines private public large small research undergraduate etc and has something to offer for readers in every realm of academia The collection challenges the reader to think about how to implement and improve undergraduate research experiences what such experiences mean to students and faculty and how such experiences can take a permanent place in the modern preparation of undergraduate mathematics and STEM majors The book is an open invitation to learn about what has worked and what hasn't in the inspiration and has the potential to ignite initiatives with long lasting benefits to students and faculty nationwide See Full Review Notices of the AMS The US National Science Foundation NSF Research Experiences for Undergraduates REU program in mathematics is now 25 years old and it is a good time to think about what it has achieved how it has changed and where this idea will go next This was the premise of the conference held at Mt Holyoke College during 21-22 June 2013 and this circle of ideas is brought forward in this volume The conference brought together diverse points of view from NSF administrators leaders of university wide honors programs to faculty who had led REUs recent PhDs who are expected to lead them soon and students currently in an REU themselves The conversation was so varied that it justifies a book length attempt to capture all that was suggested reported and said Among the contributors are Ravi Vakil Stanford Haynes Miller MIT and Carlos Castillo Chavez Arizona President's Obama Committee on the National Medal of Science 2010-2012 This book should serve not only as a collection of speakers notes but also as a source book for anyone interested in teaching mathematics and in the possibility of incorporating research like experiences in mathematics classes at any level as well as designing research experiences for undergraduates outside of the classroom *Educational Interfaces between Mathematics and Industry* Alain

Damlamian, José Francisco Rodrigues, Rudolf Sträßer, 2013-12-09 This book is the Study Book of ICMI Study no 20 which was run in cooperation with the International Congress on Industry and Applied Mathematics ICIAM The editors were the co chairs of the study Damlamian Straesser and the organiser of the Study Conference Rodrigues The text contains a comprehensive report on the findings of the Study Conference original plenary presentations of the Study Conference reports on the Working Groups and selected papers from all over world This content was selected by the editors as especially pertinent to the study each individual chapter represents a significant contribution to current research *Communicating Mathematics* Timothy Y. Chow, Daniel C. Isaksen, 2009-02-12 This volume contains the proceedings of a conference held in July 2007 at the University of Minnesota Duluth in honor of Joseph A Gallian's 65th birthday and the 30th anniversary of the Duluth Research Experience for Undergraduates In keeping with Gallian's extraordinary expository ability and broad mathematical interests the articles in this volume span a wide variety of mathematical topics including algebraic topology

combinatorics design theory forcing game theory geometry graph theory group theory optimization and probability Some of the papers are purely expository while others are research articles The papers are intended to be accessible to a general mathematics audience including first year or second year graduate students This volume should be especially useful for mathematicians seeking a new research area as well as those looking to enrich themselves and their research programs by learning about problems and techniques used in other areas of mathematics
