Probability And Literary Form Philosophic Theory And Literary Practice In The Augustan Age:

Probability and Literary Form Douglas Lane Patey, 1984-04-12 This highly original and penetrating study explores fundamental intellectual predispositions and concepts which underpin the literature and thought of the Augustan period in England By examining in particular Augustan notions of probability and the way they provided a framework for thinking about and organising experience Dr Patey reconstructs a characteristically eighteenth century theory of literature which offers a much more satisfactory account of the work of Pope Johnson Fielding and others than the Romantic literary categories already in existence The scope of this study is encyclopaedic and it will be an essential reference work for all scholars of eighteenth century English literature and intellectual history as well as historians of ideas **Hoffmanneske**

Central to these debates was the troubling idea that things could simply happen by chance In France a major terrain of this intellectual debate the chance hypothesis engaged writers coming from many different horizons the ancient philosophies of Epicurus the Stoa and Aristotle the renewed reading of the Bible in the wake of the Reformation a fresh emphasis on direct empirical observation of nature and society the revival of dramatic tragedy with its paradoxical theme of the misfortunes that befall relatively good people and growing introspective awareness of the somewhat arbitrary quality of consciousness itself This volume is the first in English to offer a broad cultural and literary view of the field of chance in this period The essays by a distinguished team of scholars from the U S Britain and France cluster around four problems Providence in Question Aesthetics and Poetics of Chance Law and Ethics and Chance and its Remedies Convincing and authoritative this collection articulates a new and rich perspective on the culture of sixteenth and seventeenth century France

The English Novel, 1700-1740 Robert Letellier, 2003-02-28 The English novel written between 1700 and 1740 remains a comparatively neglected area In addition to Daniel Defoe whose Robinson Crusoe and Moll Flanders are landmarks in the history of English fiction many other authors were at work These included such women as Penelope Aubin Jane Barker Mary Davys and Eliza Haywood who made a considerable contribution to widening the range of emotional responses in fiction These authors and many others continued writing in the genres inherited from the previous century such as criminal biographies the Utopian novel the science fictional voyage and the epistolary novel This annotated bibliography includes entries for these works and for critical materials pertinent to them The volume first seeks to establish the existing studies of the era along with anthologies It then provides entries for a wide ranging selection of works which cover fictional theoretical historical political and cultural topics to provide a comprehensive background to the unfolding and understanding of prose fiction in the early 18th century This is followed by an alphabetical listing of novels their editions and any critical material available on each The next section provides a chronological record of significant and enduring works of fiction composed or translated in this period The volume concludes with extensive indexes

The Oxford Handbook of English Prose, 1640-1714, 2024-11-05 The Oxford Handbook of English Prose 1640 1714 is the most wide ranging overview available of prose writing in English during one of the most tumultuous periods in British and Irish history Stretching from the outbreak of the English Civil Wars to the death of Queen Anne the last Stuart monarch the volume is unprecedented in the breadth of its coverage of an age in which prose moved from the margins of cultural life in Britain to its centre The volume also breaks new ground in the diversity of the prose writing it covers its thirty six chapters by an array of established literary critics and historians capture the excitingly multiple forms that prose took in what was a golden age for non fictional writing but which also saw the emergence of modes of prose fiction that became part of the origin story of the eighteenth century novel This Handbook reflects that multiplicity and diversity in its structure Four longer introductory chapters map the changing contexts of the publication and reception of prose in the period as well as the influence of the classical heritage and the role of relations with

continental Europe The subsequent thirty two chapters are organized by different categories of prose writing The contributors approach key authors and texts from various and often unconventional perspectives The volume offers coverage of well known writers and texts while also capturing the assortment of prose writing in a time of rapid political and social change there are chapters on for example Bites and Shams Circulation Narratives Keys Pornography Recipe Books True Accounts and even Handbooks
