**Problem Solving** Otto Hollaway,1975     Anti-Authoritarian Curriculum Practice Daniel J. Castner,Jennifer L. Schneider,James G. Henderson,2025-07-10 Drawing upon curriculum studies and utilizing curricular concepts this book provides a framework for teachers interested in imagining enacting and reflecting upon their daily practices in ways that defy the standardization and bureaucratic management of curriculum and instruction and responds to the needs and interests of their local contexts Although the specific experiences of teachers can vary significantly based on factors such as location district policies and community dynamics the current socio political landscape surrounding educational institutions from pre K through higher education de professionalizes educators Instead of providing an ideological critique of this state of affairs this book provides practitioners with a pragmatic framework that empowers them to critically and creatively engage curriculum in ways that are meaningful within their particular contexts     **End the Biggest Educational and Intellectual Blunder in History** Norman W. Edmund,2005 This book discusses misunderstandings related to the scientific method of creative problem solving and decision making The author has conducted extensive research in this field for more than 15 years and shows that the misunderstandings have created great harms in the educational field and in most other fields This book will be important reading for all those interested in better education better thinking and a better society     Catalog of Copyright Entries.
