problem independently and then compare the results with those presented in the literature. The example problems are arranged in such a manner that each page is balanced. The utility of this collection has been enhanced by inclusion of first a compound index which allows rapid identification of rearrangements associated with a specific substrate, second a reaction type index which unifies reactions associated with a particular transition state and brings into focus the usefulness of Woodward-Hoffman notations in understanding bond formation and cleavage, and finally a problem classification index. This work is of great value to organic chemists and researchers and organic chemistry teachers and students.
