Roberson, Harvey Wallace, 2014-12-24 **Court Delay and Law Enforcement in China** Qing-Yun Jiang, 2008-05-15 Foreword Qing Yun Jiang was born in Fujian China He studied International Business Administration at the Shanghai Institute of Foreign Trade in Shanghai where he graduated with a Bachelor of Economics In 1997 he started studying at the University of Hamburg After his Master study and his successful completion of the necessary law examinations he was

admitted as a doctoral student in the law faculty in 2001 In addition to his study of German civil criminal and administrative laws Jiang demonstrated an increasing interest in law and economics especially in the relationship between law and economic development It is now a well established fact that the rule of law the protection of property rights and a swift and timely resolution to conflicts are corner stones of economic development and long term economic growth In many developing countries court delays are a major shortcoming of the legal system This is true for countries in Latin America and in many Asian countries Empirical findings show a 15 year length of civil procedure from the first filing of the case to the Supreme Court decision This leads to court crises in the sense that private disputes are not brought to the court Private parties attempt to circumvent the official legal system all together When making contracts they resort to self enforcing contracts to self help and if available to private alternative dispute settlement In his thesis Jiang presents an empirical study of court delays in China

Why Children Follow Rules Tom R. Tyler, Rick Trinkner, 2017 Legal socialization is the process by which children and adolescents acquire their law related values attitudes and reasoning capacities Such values and attitudes in particular legitimacy underlie the ability and willingness to consent to laws and defer to legal authorities that make legitimacy based legal systems possible By age eighteen a person s orientation toward law is largely established yet legal scholarship has largely ignored this process in favor of studying adults and their relationship to the law *Why Children Follow Rules* focuses upon legal socialization outlining what is known about the process across three related but distinct contexts the family the school and the juvenile justice system Throughout Tom Tyler and Rick Trinkner emphasize the degree to which individuals develop their orientations toward law and legal authority upon values connected to responsibility and obligation as opposed to fear of punishment They argue that authorities can act in ways that internalize legal values and promote supportive attitudes In particular consensual legal authority is linked to three issues how authorities make decisions how they treat people and whether they recognize the boundaries of their authority When individuals experience authority that is fair respectful and aware of the limits of power they are more likely to consent and follow directives Despite clear evidence showing the benefits of consensual authority strong pressures and popular support for the exercise of authority based on dominance and force persist in America s families schools and within the juvenile justice system As the currently low levels of public trust and confidence in the police the courts and the law undermine the effectiveness of our legal system Tom Tyler and Rick Trinkner point to alternative way to foster the popular legitimacy of the law in an era of mistrust
