Translation and Literary Studies Marella

Feltrin-Morris, Deborah Folaron, Maria Constanza Guzmán, 2014-04-08 By nature a transdisciplinary area of inquiry translation lends itself to being investigated at its intersection with other fields of study Translation and Literary Studies seeks to highlight the manifold connections between translation and notions of gender dialectics agency philosophy and power The volume also offers a timely homage to renowned translation theorist Marilyn Gaddis Rose who was at the forefront of the group of scholars who initiated and helped to institutionalize translation studies Inspired by Gaddis Rose's work and particularly by her concept of stereoscopic reading the volume is dynamically complementary to the burgeoning contemporary field of global comparative literature underscoring the diversity of critical literary thought and theory worldwide Arranged thematically around questions of translation as literary and cultural criticism as epistemology and as poetics and politics and dealing with works within and beyond the Western tradition the essays in the volume illustrate the multi-voiced spectrum of literary translation studies today

Parallel Text Processing Jean Véronis, 2013-03-14 |

This book evolved from the ARCADE evaluation exercise that started in 1995 The project's goal is to evaluate alignment systems for parallel texts i.e. texts accompanied by their translation Thirteen teams from various places around the world have participated so far and for the first time some ten to fifteen years after the first alignment techniques were designed the community has been able to get a clear picture of the behaviour of alignment systems Several chapters in this book describe the details of competing systems and the last chapter is devoted to the description of the evaluation protocol and results The remaining chapters were especially commissioned from researchers who have been major figures in the field in recent years in an attempt to address a wide range of topics that describe the state of the art in parallel text processing and use As I recalled in the introduction the Rosetta stone won eternal fame as the prototype of parallel texts but such texts are probably almost as old as the invention of writing Nowadays parallel texts are electronic and they are becoming an increasingly important resource for building the natural language processing tools needed in the multilingual information society that is currently emerging at an incredible speed Applications are numerous and they are expanding every day multilingual lexicography and terminology machine and human translation cross language information retrieval language learning etc
