

## SEISMIC VELOCITIES AND SUBSEA PERMAFROST IN THE BEAUFORT SEA, ALASKA

The distribution of high-velocity material was used as an indicator of ice-bonded permafrost. Observations from ice survey and marine seismic records, coupled with control from a small number of drill holes, suggest that ice-bonded permafrost is extremely widespread in the Beaufort Sea. Large areas of high-velocity material at shallow depths, 10-40 m below the seabed, were observed near Prudhoe and Harrison Bays. In some cases these zones extended up to 35 km from shore. It was also common to find that depths to the high-velocity material increased with distance from the shore. Observed depths were as great as 150-200 m below the seabed. Velocities also commonly decreased with distance from shore to a point where it was no longer possible to identify ice-bonded horizons. Reflection analysis revealed several deep near-horizontal reflectors that re-occurred along segments of the coastline from Harrison Bay to the Canadian border. Reflectors at approximately 200 m and 450 m could be permafrost-related, although no control exists for an evaluation of this interpretation. Locally these reflectors may extend out to the shelf edge to approximately the 100-m water depth.

Petroleum industry seismic data were used to obtain an improved understanding of the regional distribution of subsea permafrost. Our observations in the U.S. Beaufort Sea are based on data from Harrison Bay east to the Canadian border. The most detailed information is from the coast out to a water depth of approximately 15 m, with the greatest detail from the Prudhoe and Harrison Bay regions (Figure 1).

It has been demonstrated that refraction analysis of the upper part of deep seismic records can be useful in locating high-velocity zones that may be ice-bonded permafrost (Munter et al. 1976, 1978). However, not all frozen materials can be located. Due to their low velocities, which are caused by warm subsea permafrost temperatures, saline pore water, gas in voids, and the coarse resolution of this technique.

Reflection interpretations can also be used to acquire information on permafrost distribution and structure, but the lack of velocity data usually makes these interpretations more speculative than those from refraction analysis. Beyond the 15-m water depth, out to the shelf edge, our only information is from reflection analysis.

### METHODS

The early-return data used for this study included nonproprietary records from Western Geophysical Company, Geophysical Service Inc., as well as data released by British Petroleum. Records from the land-sea transition were acquired during the winter over the sea ice. Examples of marine and ice survey records showing high-velocity zones interpreted as ice-bonded permafrost can be found in Neave and Sellmann (1982) and Munter et al. (1976).

Control for these observations is very limited and it is virtually nonexistent beyond the 15-m water depth and in shallower water outside the Harrison and Prudhoe Bay regions. The existing control is from shallow drilling, penetrometer observations, and high-resolution seismic studies (Osterkamp and Harrison 1976, 1980, 1981; Harrison and Osterkamp 1981; Blouin et al. 1979; Sellmann and Chamberlain 1979; Miller and Bruggers 1980; Rogers and Morack 1980, 1981). Observations in the Canadian Beaufort Sea provide indirect control with a range of permafrost velocities, horizontal limits, and thicknesses (Munter et al. 1976).

Error estimates were made to verify the analytical methods and measurements (Neave and Sellmann 1982). The consistency of results from duplicate coverage, often acquired during different years and seasons, also helped develop confidence in the results.

A model and appropriate equations are required to interpret the records and obtain depth and velocity data for the construction of maps and sections. The model used was a simple plane homogeneous layer over a half space, and our equations are derived from those provided by Grant and West (1965). Minor modifications to these equations are reported in Neave and Sellmann (1982).

A simplifying assumption was used for the refraction depth determinations: the water layer was combined with the low-velocity bottom sediments to make a single upper layer. An upper-layer velocity of 1.8 km/s was used for all profiles out to the 15-m water depth. In this zone, the upper-layer velocities were observed to range from 1.6 to 2 km/s. In deeper water an upper-layer velocity of 1.5 km/s was used.

The spatial resolution of data from this study is obviously not as great as could be obtained from

The Top Books of the Year Proceedings Of The Fourth International Conference On Seismic Zonation Held At The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year. Proceedings Of The Fourth International Conference On Seismic Zonation Held At : Colleen Hoovers "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Proceedings Of The Fourth International Conference On Seismic Zonation Held At : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.

### **FAQs About Proceedings Of The Fourth International Conference On Seismic Zonation Held At Books**

1. Where can I buy Proceedings Of The Fourth International Conference On Seismic Zonation Held At books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Proceedings Of The Fourth International Conference On Seismic Zonation Held At book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Proceedings Of The Fourth International Conference On Seismic Zonation Held At books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Proceedings Of The Fourth International Conference On Seismic Zonation Held At audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
