Advances in Fuzzy Control Dimitar Driankov, Rainer Palm, 2013-04-17 Model based fuzzy control uses a given conventional or a fuzzy open loop of the plant under control in order to derive the set of fuzzy if then rules constituting the corresponding fuzzy controller Furthermore of central interest are the consequent stability performance and robustness analysis of the resulting closed loop system involving a conventional model and a fuzzy controller or a fuzzy model and a fuzzy controller The major objective of the model based fuzzy control is to use the full available range of existing linear and nonlinear design of such fuzzy controllers which have better stability performance and robustness properties than the corresponding non fuzzy controllers designed by the use of these same techniques Proceedings of the 2000 IEEE International Symposium on Intelligent Control ,2000
