Genetic and Evolutionary Computation for Image Processing and Analysis Stefano Cagnoni, 2008 *Data Mining and Knowledge Discovery with Evolutionary Algorithms* Alex A. Freitas, 2013-11-11 This book addresses the integration of two areas of computer science namely data mining and evolutionary algorithms Both these areas have become increasingly popular in the last few years and their integration is currently an area of active research In essence data mining consists of extracting valid comprehensible and interesting knowledge from data Data mining is actually an interdisciplinary field since there are many kinds of methods that can be used to extract knowledge from data Arguably data mining mainly uses methods from machine learning a branch of artificial intelligence and statistics including statistical pattern recognition Our discussion of data mining and evolutionary algorithms is primarily based on machine learning concepts and principles In particular in this book we emphasize the importance of discovering comprehensible interesting knowledge which the user can potentially use to make intelligent decisions In a nutshell the motivation for applying evolutionary algorithms to data mining is that evolutionary algorithms are robust search methods which perform a global search in the space of candidate solutions rules or another form of knowledge representation In contrast most rule induction methods perform a local greedy search in the space of candidate rules Intuitively the global search of evolutionary algorithms can discover interesting rules and patterns that would be missed by the greedy search Genetic and Evolutionary Computation Conference Hans-Georg Beyer, 2005 **Proceedings of the Genetic and Evolutionary Computation Conference** , 2002 Extending the Scalability of Linkage Learning Genetic Algorithms Ying-ping Chen, 2006 Genetic algorithms GAs are powerful search techniques based on principles of evolution and widely applied to solve problems in many disciplines However most GAs employed in practice nowadays are unable to learn genetic linkage and suffer from the linkage problem The linkage learning genetic algorithm LLGA was proposed to tackle the linkage problem with several specially designed mechanisms While the LLGA performs much better on badly scaled problems than simple GAs it does not work well on uniformly scaled problems as other competent GAs Therefore we need to understand why it is so and need to know how to design a better LLGA or whether there are certain limits of such a linkage learning process This book aims to gain better understanding of the LLGA in theory and to improve the LLGA's performance in practice It starts with a survey of the existing genetic linkage learning techniques and describes the steps and approaches taken to tackle the research topics including using promoters developing the convergence time model and adopting subchromosomes **Genetic and Evolutionary Computation Conference** , 2005 Advances in Learning Classifier Systems Pier L. Lanzi, Wolfgang Stolzmann, Stewart W. Wilson, 2003-08-01 This book constitutes the thoroughly refereed post proceedings of the 4th International Workshop on Learning Classifier Systems IWLCS 2001 held in San Francisco CA USA in July 2001 The 12 revised full papers presented together with a special paper on a formal description of ACS have gone through two rounds of reviewing and improvement The first part of the book is

devoted to theoretical issues of learning classifier systems including the influence of exploration strategy self adaptive classifier systems and the use of classifier systems for social simulation The second part is devoted to applications in various fields such as data mining stock trading and power distribution networks New Optimization Techniques in Engineering Godfrey C. Onwubolu, B. V. Babu, 2013-03-14 Presently general purpose optimization techniques such as Simulated Annealing and Genetic Algorithms have become standard optimization techniques Concerted research efforts have been made recently in order to invent novel optimization techniques for solving real life problems which have the attributes of memory update and population based search solutions The book describes a variety of these novel optimization techniques which in most cases outperform the standard optimization techniques in many application areas New Optimization Techniques in Engineering reports applications and results of the novel optimization techniques considering a multitude of practical problems in the different engineering disciplines presenting both the background of the subject area and the techniques for solving the problems **Proceedings of the ...
