Proceedings Of The Tenth West Coast Conference On Formal Linguistics:

Proceedings of the 10th West Coast Conference on Formal Linguistics Dawn Bates, 1992 Forty one papers from the 1991 West Coast Conference on Formal Linguistics are included The papers deal with diverse topics ranging from the traditional linguistic fields of phonology morphology syntax and semantics to the rapidly developing areas of cognitive and discourse linguistics

Situation Theory and Its Applications: Volume 3 Robin Cooper, Peter Aczel, Kuniaki Mukai, John Perry, 1990 Situation theory is the result of an interdisciplinary effort to create a full fledged theory of information Created by scholars and scientists from cognitive science computer science and AI linguistics logic philosophy and mathematics it aims to provide a common set of tools for the analysis of phenomena from all these fields Unlike Shannon Weaver type theories of information which are purely quantitative theories situation theory aims at providing tools for the analysis of the specific content of a situation signal message data base statement or other information carrying situation The question addressed is not how much information is carried but what information is carried

Studies in Contemporary Phrase Structure Grammar Robert D. Levine, Georgia M. Green, 1999 This book explores a wide variety of theoretically central issues in the framework of Head Driven Phrase Structure Grammar HPSG a major theory of syntactic representation particularly in the domain of natural language computation HPSG is a strongly lexicon driven theory like several others on the scene but unlike the others it also relies heavily on an explicit assignment of linguistic objects to membership in a hierarchically organised network of types where constraints associated with any given type are inherited by all of its subtypes This theoretical architecture allows HPSG considerable flexibility within the confines of a highly restrictive mathematically explicit formalism requiring no derivational machinery and invoking only a single level of syntactic representation The separate chapters consider a variety of problematic phenomena in German Japanese and English and suggest important extensions of and revisions to the picture of HPSG

Language and Learning for Robots Colleen Crangle, Patrick Suppes, 1994 This book develops the notion of an instructable robot one which derives its intelligence in part from interaction with humans Since verbal interaction with a robot requires a natural language semantics the authors propose a natural model semantics which they then apply to the interpretation of robot commands

Computational Models of American Speech Mary Margaret Withgott, Francine R. Chen, 1993-03 A new perspective on phonetic variation is achieved in this volume through the construction of a series of models of spoken American English In the past computer theorists and programmers investigating pronunciation have often relied on their own knowledge of the language or on limited transcription data Speech recognition researchers on the other hand have drawn on a great deal of data but without examining in detail the information about pronunciation the data contains The authors combine the best of each approach to develop probabilistic and rule based computational models of transcription data An ongoing controversy in studies of phonetic variation is the existence and proper definition of a phonetic unit The authors argue that assumptions about the units of spoken language are critical to a

computational model Their computational models employ suprasegmental elements such as syllable boundaries stress and position in a unit called a metrical foot The use of such elements in modeling data enables the creation of better computational models for both recognition and synthesis technology This book should be of interest to speech engineers linguists and anyone who wishes to understand symbolic systems of communication

Head-Driven Phrase Structure Grammar Carl Pollard, Ivan A. Sag, 1994-08-15 This book presents the most complete exposition of the theory of head driven phrase structure grammar HPSG introduced in the authors Information Based Syntax and Semantics HPSG provides an integration of key ideas from the various disciplines of cognitive science drawing on results from diverse approaches to syntactic theory situation semantics data type theory and knowledge representation The result is a conception of grammar as a set of declarative and order independent constraints a conception well suited to modelling human language processing This self contained volume demonstrates the applicability of the HPSG approach to a wide range of empirical problems including a number which have occupied center stage within syntactic theory for well over twenty years the control of understood subjects long distance dependencies conventionally treated in terms of wh movement and syntactic constraints on the relationship between various kinds of pronouns and their antecedents The authors make clear how their approach compares with and improves upon approaches undertaken in other frameworks including in particular the government binding theory of Noam Chomsky

Lexical Matters Anna Szabolcsi, Ivan Sag, 1992-06 This volume contains new research on the lexicon and its relation to other aspects of linguistics These essays put forth empirical arguments to claim that specific theoretical assumptions concerning the lexicon play a crucial role in resolving problems pertaining to other components of grammar Topics include syntactic semantic interface in the areas of aspect argument structure and thematic roles lexicon based accounts of quirky case anaphora and control the boundary between the lexicon and syntax in the domains of sentence comprehension and nominal compounding and the possibility of extending the concept of blocking beyond the traditional lexicon Ivan Sag is a professor of linguistics at Stanford University Anna Szabolcsi is an associate professor of linguistics at UCLA

The Blackwell Companion to Syntax Martin Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at www.companiontosyntax.com This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians There exists no other comparable collection of research that documents the development of syntax in this way Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds Sandra Chung Susan Rothstein Adriana Belletti Jim Huang Howard Lasnik and Marcel den Dikken among many others A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years Brings

together the world's leading syntacticians to provide a large and diverse number of case studies in the field. Explores a comprehensive range of syntax topics from an historical perspective. Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar. Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics. Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures. Each multi-volume set is also accompanied by a CD Rom of the entire Companion. Like the prestigious Blackwell Handbooks in Linguistics series, this multi-volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated.

Postvelar Harmony
Kimary N. Shahin, 2003-01-30. This book examines the formal bases of postvelar harmony and its crosslinguistic variation. It is of interest especially to phonologists concerned with segmental harmony and its explanation within Optimality Theory. Postvelar harmony in two unrelated languages, Palestinian Arabic and St'at'imcets Salish, is examined in detail. The result is the first comprehensive clarification of postvelar phonology for either language. Two harmonies are distinguished: uvularisation harmony (emphasis spread) and pharyngealisation (tongue root retraction harmony). The distinction between these two in the Arabic and the Salish is supported by much instrumental phonetics data. The complex harmony properties are explained as the result of systematic interaction between Correspondence Alignment and Grounded constraints. In the course of the investigation, the segmental inventories of both languages are clarified and a careful understanding of the distinction between phonology and phonetics and the use of phonetics in phonology is applied.
