Australian Rainforests D. M. J. S. Bowman, 2000-02-17 A critical evaluation of the ecological hypotheses proposed to explain the distribution of Australian rainforests **Tropical Rainforest Research in Australia** Nicola Goudberg, Michael Bonell, Dominique Benzaken, 1991 **The Rainforest Legacy** Garry L. Werren, Peter Kershaw, 1987 A Sherlock Holmes mystery **Australian Rainforests** Paul Adam, 1992 Once the dominant vegetation type of the entire continent the Australian rainforests have shrunk over many millions of years to their present limited size However the forests and their history continue to hold valuable lessons for biogeographers and environmentalists This book gives a general account of the Australian rainforests their composition and location and how their present distribution has evolved The author's aim is to provide a broad biogeographical framework that will enable new information to be considered in a global perspective The book concludes with a historical account of human interaction with the rainforest from late Pleistocene times to the 1980s Biogeographers botanists and ecologists at all levels will find this to be a rich source of information and an inspiration for continuing efforts to conserve existing rainforests around the world **Journal of the Royal Society of New Zealand**, 1993-12 *Peopled Landscapes* Simon Haberle, Bruno David, 2012-01-01 This volume brings together a collection of papers from a diverse field of international scholars exploring the multiple ways that East Timorese communities are making and remaking their connections to land and places of ancestral significance The work is explicitly comparative and highlights the different ways Timorese language communities negotiate access and transactions in land disputes and inheritance especially in areas subject to historical displacement and resettlement Consideration is extended to the role of ritual performance and social alliance for inscribing connection and entitlement Emerging through analysis is an appreciation of how relations to land articulated in origin discourses are implicated in the construction of national culture and differential contributions to the struggle for independence Publisher's description **The Ecology and Biogeography of Nothofagus Forests** Thomas T. Veblen, Robert S. Hill, Jennifer Read, 1996-01-01 Ecologists and biogeographers have been intrigued for a long time by the striking similarity of the vegetation and flora of southern temperate zone regions separated by large oceans These scientists have been particularly interested in the occurrence in these regions of Nothofagus southern beeches This book which focuses on the distribution history and ecology of the genus Nothofagus provides a key to understanding the historical plant geography and modern vegetation patterns of the southern hemisphere The book begins with a discussion of the long term and broad scale patterns of origin and differentiation in the genus Next each major Nothofagus biome is discussed first in a chapter that considers contemporary ecological patterns and then in a chapter that focuses on the history and paleoecology of the region Authorities in the field deal with the temperate zone of the southwest Pacific region New Zealand and Australia the adjacent tropical zone of the southwest Pacific New Guinea and New Caledonia and South America ranging from the Mediterranean type climate region of central Chile to the subantarctic latitudes of Tierra del Fuego *Flammable Australia*

Ross A. Bradstock, Jann E. Williams, Malcolm A. Gill, 2002 Fire is pivotal to the functioning of ecosystems in Australia affecting the distribution and abundance of the continent's unique and highly diverse range of plants and animals. Conservation of this natural biodiversity therefore requires a good understanding of scientific processes involved in the action of fire on the landscape. This book provides an up to date synthesis of current knowledge in this area and its application in contemporary land management. Central to the discussion is an exploration of the concept of the fire regime and its interactions with biodiversity.
