Intelligent Computing Kohei Arai, 2025-08-09 This book compiles a curated selection of insightful, rigorously researched and state of the art papers presented at the Computing Conference 2025 hosted in London UK on June 19-20, 2025. Drawing submissions from across the globe, the conference received 473 papers, each subjected to a stringent double blind peer review process. Of these, 169 papers were accepted for inclusion, reflecting exceptional scholarship and innovation across disciplines such as IoT, artificial intelligence, computing, data science, networking, data security and privacy. Researchers, academics and industry leaders converged to share pioneering ideas, transformative methodologies and practical solutions to real world challenges. By bridging academic theory and industrial application, the conference catalyzed opportunities for knowledge synthesis and interdisciplinary progress. The diverse contributions within this proceedings not only address contemporary technological issues but also anticipate future trends, offering frameworks for continued exploration. We trust this collection will serve as an indispensable reference for researchers, practitioners and policymakers navigating the evolving landscapes of computing and digital innovation. As we reflect on the conference's outcomes, we are confident that the insights and collaborations forged here will inspire sustained advancements in these critical fields. May the ideas within these pages spark further inquiry, drive technological evolution and contribute meaningfully to solving the challenges of our interconnected world.

Artificial Intelligence and the Value Alignment Problem Travis LaCroix, 2025-04-07 Written for an interdisciplinary audience, this book provides strikingly clear explanations of the many difficult technical and moral concepts central to discussions of ethics and AI. In particular, it serves as an introduction to the value alignment problem, that of ensuring that AI systems are aligned with the values of humanity. LaCroix redefines the problem as a structural one, showing the reader how various topics in AI ethics, from bias and fairness to transparency and opacity, can be understood as instances of the key problem of value alignment. Numerous case studies are presented throughout the book to highlight the significance of the issues at stake and to clarify the central role of the value alignment problem in the many ethical challenges facing the development and implementation of AI.
