Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Academic Brands Mario Biagioli, Madhavi Sunder, 2022-07-21 The first comprehensive analysis of the emergence of academic brands this book explores how the modern university is being transformed in an increasingly global economy of higher education where luxury is replacing access More than just a sign of corporatization and privatization academic brands provide a unique window on the university s concerns and struggles with conveying excellence and reputation in a competitive landscape organized by rankings while also capitalizing on its brand to generate revenue when state support dwindles This multidisciplinary volume addresses topics including the uniqueness of academic brands their role in the global brand economy of distinction and their vulnerability to problematic social and political associations By focusing on brands the volume analyzes the tensions between the university s traditional commitment to public interest values education research and the production of knowledge and its increasingly managerial culture framed by corporate private values Available as Open Access on Cambridge Core
