Electric Vehicle Technology Dr. R. A. Kapgate, Amit Joshi, Dr. Pradeep Ammasaikutti, Dr. I. D. Soubache ,2025-09-27

Electric Vehicle EV Technology focuses on the design development and operation of vehicles powered primarily by electric energy instead of conventional fossil fuels It integrates knowledge from electrical engineering power electronics battery technology and control systems to enable efficient sustainable and environmentally friendly transportation The subject covers key areas such as battery management systems electric motors charging infrastructure regenerative braking and vehicle to grid V2G technologies It also explores trends in energy storage renewable energy integration and the environmental impact of EV adoption EV technology plays a critical role in reducing carbon emissions and advancing the future of sustainable mobility

*Advancements in Electric Vehicle Infrastructure: From Development to Optimization* Kirti Pal,Tripti Kunj,2024-11-07 In *Advancements in Electric Vehicle Infrastructure From Development to Optimization* readers embark on an enlightening journey through the ever evolving landscape of electric mobility This comprehensive guide delves into the historical evolution of electric vehicle technology providing invaluable insights into the unique challenges and opportunities in transitioning to electric mobility From optimal location and management of EV charging stations to a comparative analysis of charger types and their impact on distribution networks this book offers a detailed exploration of EV infrastructure optimization With a keen focus on prospects readers gain a deep understanding of policy considerations consumer trends global market dynamics and emerging technologies shaping the future of electric mobility Whether you re a researcher policymaker industry professional or student *Advancements in Electric Vehicle Infrastructure* is your indispensable companion for navigating the complexities of electric transportation and driving positive change towards a sustainable future

Advanced Technologies in Electric Vehicles Vijayakumar Gali,Luciane Neves Canha,Mariana Resener,Bibiana Ferraz,Madisa V.G. Varaprasad,2024-02-26 *Advanced Technologies in Electric Vehicles Challenges and Future Research Developments* discusses fundamental and advanced concepts challenges and future perspectives surrounding EVs Sections cover advances and long term challenges such as battery life span efficiency and power management systems In addition the book covers all aspects of the EV field including vehicle performance configuration control strategy design methodology modeling and simulation for different conventional and modern vehicles based on mathematical equations By tackling the fundamentals theory and design of conventional electric vehicles EVs hybrid electric vehicles HEVs and fuel cell vehicles FCVs this book presents a comprehensive reference Investment in hybrid and electric vehicle EV technology research has been increasing steadily in recent years both from governments and within companies The role of the combustion engine in causing climate change has put the automobile industry on a path of rapid evolution towards electric vehicles bringing experts with a range of backgrounds into the field Provides the latest advances in battery management systems to address power quality issues Explains step by step methodologies for the testing of EV battery systems Explores the technological

**Security and Privacy-Preserving Techniques in Wireless Robotics** Amit Kumar Tyagi, Ajith Abraham, A. Kaklauskas, N. Sreenath, Gillala Rekha, Shaveta Malik, 2022-08-17 The wide gap between the existing security solutions and the actual practical deployment in smart manufacturing smart home and remote environments with respect to wireless

robotics is one of the major reasons why we require novel strategies mechanisms architectures and frameworks Furthermore it is also important to access and understand the different level of vulnerabilities and attack vectors in Wireless Sensor Network WSN and Wireless Robotics This book includes an in depth explanation of a secure and dependable Wireless Robotics WR architecture to ensure confidentiality authenticity and availability Features Blockchain technology for securing data at end server side Emerging technologies networking like Cloud Edge Fog etc for communicating and storing data securely Various open issues challenges faced in this era towards wireless robotics including several future research directions for the future Several real world s case studies are included Chapters on ethical concerns and privacy laws i e laws for service providers Security and privacy challenges in wireless sensor networks and wireless robotics The book is especially useful for academic researchers undergraduate students postgraduate students and industry researchers and professionals

*Computational Sustainability* Jörg Lässig,Kristian Kersting,Katharina Morik,2016-04-20 The book at hand gives an overview of the state of the art research in Computational Sustainability as well as case studies of different application scenarios This covers topics such as renewable energy supply energy storage and e mobility efficiency in data centers and networks sustainable food and water supply sustainable health industrial production and quality etc The book describes computational methods and possible application scenarios

**Development and Implementation of an E-Vehicle Allocation Optimized System for Corporate Usage** ,2019-03-20 Master s Thesis from the year 2018 in the subject Engineering Automotive Engineering Technical University of Munich language English abstract This thesis is an initial approach to analyze the design and implementation of an e vehicle sharing system in the P3 Group o ce in Paris An overview of the electric vehicle charging infrastructure along with the relevant aspects of charging modes is provided A showcase of the analysis of di erent car sharing models within Europe is given after which a specific case study is analyzed in greater detail The parameters and features for the system were derived from a competitive benchmark of the car sharing models on the market today The objective was to assist the company in planning and managing a corporate e vehicle sharing system in a profitable way while o ering the employees good quality service Therefore the cost of designing and installing the P3 EV charging station was evaluated On this matter empirical data was gathered from P3 employees to better understand their daily commute their needs and their expectations of the system An optimization model for distances cost and charging patterns was discussed and formalized as an integer linear program in MATLAB Given the complexity inherent to this optimization model stochastic distribution was employed to minimize the cost for the company taking into consideration the trips paid and the costs involved namely the personal wage of an employee A focus on the optimal design of an e vehicle sharing system was necessary while considering the problem s dimensionality number of vehicles parking places battery capacities etc and employee relocation time This study determines if the system provides higher net benefits to the company than available transportation alternatives As a result of this pricing comparison a significant reduction in total cost could be

achieved for the company The data set conclusively supports the implementation of the e vehicle sharing system which provides a decreased cost versus the use of public transportation A possible avenue of future research is to extend the functionality of the developed model by adding a responsive user demand and possibly maximizing the car sharing ridership between employees

*Strategic Management and Sustainability Transitions* Michael Zhang,2023-12-01 The subject of sustainability transitions has in the past decade or so become an established research field for academics policy makers and practitioners alike Conceptual and theoretical developments in the field have gradually advanced from the perspectives of socio technical systems and business models Scholars contend that it is the interactions of the networks of actors technologies and institutions that drive transition processes toward sustainability In this volume we further advance this line of inquiry with a special reference to strategic management of sustainability transitions in both theory and practice In theoretical development we have selected three chapters to encompass the themes of 1 the interactions between ecological systems and human systems 2 a critique on the continuous expansion of large multinational companies and their strategic control of key resource inputs through the lenses of circular economy and natural resource based view and 3 a multi stakeholder ecosystems framework for the management of sustainability transitions with structural alignment of focal value propositions The United Nations Sustainable Development Goals SDGs are critically addressed and empirically examined It will become an essential reader and a reference book for researchers and postgraduate students interested in strategic management international business innovation studies consumer behavior and public administration
