# Rambles Of A Botanist Among The Plants

**Anne Marie Todd**

## **Rambles Of A Botanist Among The Plants:**

**Valley of Heart's Delight** Anne Marie Todd, 2022-10-25 This agricultural history explores the transformation of the Santa Clara Valley over the past one hundred years from America's largest fruit producing region into the technology capital of the world. In the latter half of the twentieth century the region's focus shifted from fruits such as apricots and prunes to computers. Both personal and public rhetoric reveals how a sense of place emerges and changes in an evolving agricultural community like the Santa Clara Valley. Through extensive archival research and interviews Anne Marie Todd explores the concepts of place and placelessness, arguing that place is more than a physical location and that exploring a community's sense of place can help us to map how individuals experience their natural surroundings and their sense of responsibility towards the local environment. Todd extends the concept of sense of place to describe Silicon Valley as a non-place where weakened or disrupted attachment to place threatens the environment and community. The story of the Santa Clara Valley is an American story of the development of agricultural lands and the transformation of rural regions.

It unearths new material on Muir's famous first summer in Yosemite and his influence on other environmentalists in California and beyond. It offers new insights into his relationship with his family and friends as well as analyzes Muir's importance in terms of literary and religious themes. This is a valuable addition to the growing literature on John Muir.
