The Place of Narrative Marilyn Aronberg Lavin, 1990-12-15 Looking at more than two hundred Italian medieval and Renaissance mural cycles Lavin examines with the aid of computer technology the rearranged chronologies of familiar religious stories found therein Like many masterpieces Lavin s book builds upon a simple idea it is possible to do a computer analysis of visual narratives This is the first computer based study of the visual arts of which I am aware that illustrates how those technologies can utterly transform the study of old master art An extremely important book one likely to become the most influential recent study of art of this period *The Place of Narrative* is also a beautiful artifact David Carrier Leonardo Covering over a millennium and dealing with the whole of Italy Lavin makes pioneering use of new methodology employing a computer database and novel terminology to describe the disposition of scenes of church and chapel walls We should recognize this as a book of high seriousness which reaches out into new areas and which will fruitfully stimulate much thought on a neglected subject of very considerable significance Julian Gardner Burlington Magazine
