Rapid Force Projection Technologies:

Rapid Force Projection Technologies John Matsumura, 2000 This documented briefing summarizes research supporting the Rapid Force Protection Initiative RFPI Advanced Concept Technology Demonstration ACTD with the goal of exploring new technology concepts for the ACTD The focus of this research was on advanced distributed ground sensors specifically the air deliverable acoustic sensor ADAS with emphasis on how such sensors might fit into the current RFPI hunter standoff killer concept High resolution simulation was used to examine and quantify many of the key aspects of performance environmental effects and military utility

Rapid Force Projection Technologies Randall Steeb, 1996 Exploring new technology concepts for light airborne forces

Rapid Force Projection Randall Steeb, 1996 Using computer simulations RAND analysts examined compared and contrasted new technologies and systems that would allow light forces to better withstand and overcome attacks from larger more heavily armed forces in varying terrain

Rapid Force Projection Technologies: A Quick-Look Analysis of Advanced Light Indirect Fire Systems, 1996 The days of U S military forces defending a known area of terrain with a large prepositioned force appear to be drawing to a close In the future as in the recent past the U S Army will need to deploy to areas of potential or actual conflict Furthermore because time is often critical in overseas operations the United States must have land forces that can deploy quickly both by air and by sea The RFPT project at RAND concentrates on the airliftable portion of these forces in the early entry role RAND DB 168 A OSD Steeb et al 1996 highlights this project and its recent accomplishments

Weapon Systems, 1994

Rapid Force Projection Technologies: A Quick-Look Analysis of Advanced Light Indirect Fire Systems. Documented Briefing, 1996 The days of U S military forces defending a known area of terrain with a large propositioned force appear to be drawing to a close In the future as in the recent past the U S Army will need to deploy to areas of potential or actual conflict Furthermore because time is often critical in overseas operations the United States must have land forces that can deploy quickly both by air and by sea The RFPT project at RAND concentrates on the airliftable portion of these forces in the early entry role RAND DB 168 A OSD Steeb et al 1996 highlights this project and its recent accomplishments

Rapid Force Projection Technologies Assessing the Performance of Advanced Ground Sensors, 2000 Over the past several years RAND has been exploring how new concepts made viable with emerging technologies can dramatically improve the effectiveness of light ground forces particularly in the early entry role Motivation for this area of research is derived from studies showing that the U S military will need to deploy with greater speed lethality and survivability in the future and that light forces will be the first deployed Limitations of recent capability were observed during the Desert Shield build up where airborne ground forces such as the 82nd Division Ready Brigade DRB were deployed to secure key terrain without a credible anti armor capability 1 Such improvements to early entry capabilities appear even more germane in light of the concomitant reductions in prepositioned forces abroad and the rapid increase in threat uncertainty Thus as difficult as the early entry challenge has

been in the recent past early signposts suggest even more difficult challenges ahead

Rapid Force Projection: Exploring New Technology Concepts for Light Airborne Forces. Documented Briefing, 1996 The days of U S military forces defending a predetermined terrain with a large prepositioned force appear to be drawing to a close In the future as in the recent past the U S Army will need to deploy to areas of potential or actual conflict Furthermore because response time is often critical in overseas operations the United States must have land forces that can deploy quickly and decisively both by air and sea This study concentrates on the airliftable portion of these forces in the early entry role In this role light airborne forces may encounter heavy enemy forces in terrain suitable for tank maneuvers Such situations pose a grave challenge for U S light forces as they are currently configured As part of the Rapid Force Projection Initiative RFPI we examined new technology concepts that potentially allow light forces to fight and survive against such heavy forces

Analysis of Air-based Mechanization and Vertical Envelopment Concepts and Technologies John Grossman, Jonathan Gary Grossman, 2001 This document summarizes research conducted in 1998 by the Rand Arroyo Center on an exploration and assessment of the ability to insert mechanized forces in enemy controlled terrain

Joint Operations Superiority in the 21st Century John Matsumura, 1999 This documented briefing describes RAND research that supported the 1998 Defense Science Board DSB Summer Study on Joint Operations Superiority in the 21st Century Integrating Capabilities Underwriting Joint Vision 2010 RAND supported the DSB through both exploratory analysis and high resolution simulation based analysis this document only covers the high resolution work notably simulation experiments to help explore and assess Joint operational concepts It builds on related work done by the authors for the DSB effort Tactics and Technology for 21st Century Military Superiority DB 198 A The current effort draws on outcomes of other DSB studies discussions with warfighters and interactions with DSB members to define a range of different Joint operational concepts that could be applied to a future 2010 2015 notional high intensity quick reaction scenario The strengths and weaknesses of

The Army After Next John Matsumura, 1999 This document summarizes our initial year's work on the project Assessing Advanced Concepts and Technologies for the Army After Next AAN At the request of TRADOC Deputy Chief of Staff for Doctrine DCSDOC RAND Arroyo Center initiated this project about halfway into FY97 The overall intent of the

effort was to provide force on force simulation based analytic support to the AAN initiative and support the series of wargames. The effort involves the use of high resolution constructive simulation to explore both operational concepts and technology options for the light battle force concept associated with the AAN initiative. One of the key capabilities required of the light battle force is an ability to hide and wait for the right opportunity and then create a virtual ambush resulting in a shock or disintegration of the enemy. This kind of defeat to some extent is contrasted from more traditional attrition in that it greatly compresses the time in which
