Rapport Sur La Cohomologie Des Groupes:

Rapport sur la cohomologie des groupes Serge Lang, 1967 Topics in Cohomology of Groups Serge Lang, 2006-11-14
The book is a mostly translated reprint of a report on cohomology of groups from the 1950s and 1960s originally written as background for the Artin Tate notes on class field theory following the cohomological approach This report was first published in French by Benjamin For this new English edition the author added Tate's local duality written up from letters which John Tate sent to Lang in 1958 1959 Except for this last item which requires more substantial background in algebraic geometry and especially abelian varieties the rest of the book is basically elementary depending only on standard homological algebra at the level of first year graduate students *Cohomology of Groups*, 1969 Cohomology of Groups

Rapport Sur la Cohomologie Des Groupes Serge Lang, 1956 **Cohomology Theories for Compact Abelian Groups**
Karl H. Hofmann, Paul S. Mostert, 2012-12-06 Of all topological algebraic structures compact topological groups have perhaps the richest theory since 80 many different fields contribute to their study Analysis enters through the representation theory and harmonic analysis differential geometry the theory of real analytic functions and the theory of differential equations come into the play via Lie group theory point set topology is used in describing the local geometric structure of compact groups via limit spaces global topology and the theory of manifolds again play a role through Lie group theory and of course algebra enters through the cohomology and homology theory A particularly well understood subclass of compact groups is the class of compact abelian groups An added element of elegance is the duality theory which states that the category of compact abelian groups is completely equivalent to the category of discrete abelian groups with all arrows reversed This allows for a virtually complete algebraisation of any question concerning compact abelian groups The subclass of compact abelian groups is not so special within the category of compact groups as it may seem at first glance As is very well known the local geometric structure of a compact group may be extremely complicated but all local complication happens to be abelian Indeed via the duality theory the complication in compact connected groups is faithfully reflected in the theory of torsion free discrete abelian groups whose notorious complexity has resisted all efforts of complete classification in ranks greater than two *Prospects in Mathematics* Friedrich Hirzebruch, 1971-11-21 Five papers by distinguished American and European mathematicians describe some current trends in mathematics in the perspective of the recent past and in terms of expectations for the future Among the subjects discussed are algebraic groups quadratic forms topological aspects of global analysis variants of the index theorem and partial differential equations **Lexikon der Algebra** Günther Eisenreich, 2022-02-07 Keine ausführliche Beschreibung für Lexikon der Algebra verfügbar Klassenkörpertheorie Jürgen Neukirch, 2011-05-18 Die vorliegende Schrift ist eine verbesserte Neuauflage der als B I Hochschulschriften Bibliographisches Institut Mannheim 1969 erschienenen Arbeit gleichen Titels Ziel ist es einem Leser der sich mit den Grundlagen der algebraischen Zahlentheorie vertraut gemacht hat einen raschen und möglichst unmittelbaren Zugang zur

Klassentheorie zu verschaffen Die Schrift besteht aus drei Teilen deren erster die Kohomologie der endlichen Gruppen behandelt Der zweite Teil behandelt die lokale Klassentheorie und der dritte die Klassentheorie der endlichen algebraischen Zahlkörper Cohomology of Finite Groups Ari Babakhanian, A. Babakhanian, 1969 Introduction to Profinite Groups and Galois Cohomology Luis Ribes, 1970 Group Representations: Cohomology, Group Actions and Topology Alejandro Adem, 1998 This volume combines contributions in topology and representation theory that reflect the increasingly vigorous interactions between these areas Topics such as group theory homotopy theory cohomology of groups and modular representations are covered All papers have been carefully refereed and offer lasting value **Cohomology of Pro-finite Groups with Continuous Coefficients** Chin-shui Hsü, 1968 Cohomologie galoisienne Jean-Pierre Serre, 1973

Class Field Theory Jürgen Neukirch, 2013-04-08 The present manuscript is an improved edition of a text that first appeared under the same title in Bonner Mathematische Schriften no 26 and originated from a series of lectures given by the author in 1965/66 in Wolfgang Krull's seminar in Bonn Its main goal is to provide the reader acquainted with the basics of algebraic number theory a quick and immediate access to class field theory This script consists of three parts the first of which discusses the cohomology of finite groups The second part discusses local class field theory and the third part concerns the class field theory of finite algebraic number fields **Zur Normalform in der Kohomologie der Gruppen** Reinhard Unsin, 1978 **Cohomological Methods in Group Theory** Ararat Babakhanian, Ari Babakhanian, 1972 This book is intended for students interested in learning the use of cohomology and homology theory in solving problems in group theory Although cohomology groups of a groups were formally defined in the early 1940s these groups in low dimensions had been studied earlier as part of the general body of theory of groups In the last three decades cohomology of groups has played a central role in various branches of mathematics This book provides readers with the basic tools in cohomology of groups and to illustrate their use in obtaining group theoretic results **Bulletin of the American Mathematical Society**, 1971 **Groupes formels, représentations galoisiennes et cohomologie des variétés de caractéristique positive**, 1979 **Bonner mathematische Schriften**, 1991 **Lefschetz Zahlen für Galois-Operationen auf der Kohomologie arithmetischer Gruppen** Jürgen Blume-Nienhaus, 1992
