The Raptors of Arizona Richard L. Glinski, 1998-03 Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species and for those watching the skies the additional sighting of a bird of prey is a reward in itself The Grand Canyon state boasts the most dramatic assortment of raptors in North America hawks eagles falcons kites and owls plus vultures and condors Here can be found nearly all the raptor species of the continental United States and also established populations of species associated with Mexico such as the Gray Hawk Common Black Hawk Zone tailed Hawk and Whiskered Screech Owl Arizona s raptors are found in an unrivaled diversity of habitats from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs where the gigantic California Condor was introduced in 1996 Yet many species live in habitats that are now jeopardized by degradation or development making an understanding and appreciation of raptors crucial to their survival The Raptors of Arizona brings together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and syntheses on Arizona s 42 raptor species with an emphasis on aspects of their natural history in Arizona A chapter on each bird includes its description a range map and information on its distribution habitat life history and status Additional chapters cover conservation habitats where and when to watch raptors and the sport of falconry The book is enhanced by 42 full color illustrations by Richard Sloan one of the premier wildlife artists in North America whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project Co published with the Arizona Game and Fish Department Raptors of New Mexico Jean-Luc E. key question for conservation biologists and wildlife managers is how to manage the world's carnivore populations to conserve this important natural resource while mitigating harmful impacts on humans. In *People and Predators*, leading scientists and researchers offer case studies of human carnivore conflicts in a variety of landscapes including rural, urban, and political. The book covers a diverse range of taxa, geographic regions, and conflict scenarios, with each chapter dealing with a specific facet of human carnivore interactions and offering practical, concrete approaches to resolving the conflict under consideration. Chapters provide background on particular problems and describe how challenges have been met or what research or tools are still needed to resolve the conflicts. *People and Predators* will help readers to better understand issues of carnivore conservation in the 21st century and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles.

Winging it, 2005 *The Eyes*, 1989 *A Source Manual of Raptors Occurring on Corps of Engineers Lands in the Pacific Northwest Region* Tracy L. Flemming, Michael F. Passmore, 1986 This report serves as a source manual of raptors occurring on Army Corps of Engineers lands in the Pacific Northwest. It consists primarily of a comprehensive literature review covering aspects of the biology of 35 species of eagles, hawks, falcons, vultures, and owls. The manual was developed to provide biologists and resource managers with background information to facilitate the application of sound raptor management practices on project lands. While the literature is cosmopolitan, references are applicable to species found in but not limited to the Pacific Northwest. Approximately 4,000 citations compiled through 1983 are included. General guidelines on raptor management and survey techniques are provided. An outline of techniques is given for habitat assessment, development, and management applicable to Federal lands, and recommendations are provided for management needs regarding various land use practices and recreational activities. Basic procedures for conducting raptor nesting surveys, migration counts, and winter surveys are outlined. Raptor studies conducted on project lands in the US Army Engineer Division North Pacific are summarized.
