*Creation and Chaos* JoAnn Scurlock, Richard H. Beal, 2013-10-21 Hermann Gunkel was a scholar in the generation of the origins of Assyriology the spectacular discovery by George Smith of fragments of the Chaldean Genesis and the Babel Bibel debate Gunkel's thesis inspired by materials supplied to him by the Assyriologist Heinrich Zimmern was to take the Chaaskampf motif of Revelation as an event that would not only occur at the end of the world but had already happened at the beginning before Creation In other words in this theory one imagines God in Genesis 1 as first having battled Rahab Leviathan and Yam the forces of Chaos in a grand battle and only then beginning to create The problem with Gunkel's theory is that it did not simply identify common elements in the mythologies of the ancient Near East but imposed upon them a structure dictating the relationships between the elements a structure that was based on inadequate knowledge and a forced interpretation of his sources On the other hand one is not entitled to insist that there was no cultural conversation among peoples who spent the better part of several millennia trading with fighting and conquering one another Creation and Chaos attempts to address some of these issues The contributions are organized into five sections that address various aspects of the issues raised by Gunkel's theories

**Religious Influences on Health and Well-Being in the Elderly** K. **The Torah and the Stoics on humankind and nature** J.J. Boersema, 2021-09-06 The environmental problematique is intimately bound up with deep seated human attitudes regarding our relationship with nature Here in the

west those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers In this book the author re examines some of these seminal texts arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought with certain valuable traditions being all but lost in the process The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today Often misread on this point the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world A reappraisal of these sources is necessary and feasible There is no need for an appeal to cosmologies alien to our own culture nor for recourse to New Age beliefs in all their variety **Exodus Through the**
